MITRATECH

Bridgeway Suite 8.11.0

Service Pack 5

Summary

Version(s) patched:

8.11.0

Date Released:

04/24/2018

Enhancements:

Users with the appropriate security rights can now view user, group, view profile, and type profile summaries from the **Tools** page in eCounsel or Secretariat. These summaries feature the same information that is available through Suite Manager. For more information, visit the following topics in the Client Success Center:

- [Working with Summary Tools](#) (eCounsel)
- [Working with Summary Tools](#) (Secretariat)

Issue Resolutions:

- The Stock Ticker widget option has now been removed from the Home page.
  Tracking code: UPD-4941

- The Comments field was not appearing on the Invoice Summary page.
  Tracking code: UPD-5563

- When the user tried to run the Corporate Data Sheet report in Secretariat, the **Report Parameter Selection** dialog box featured an empty text field with no description. The system would prompt the user to provide values for this field, preventing the user from running the report. The text field has now been removed.
  Tracking code: UPD-5564

- When the user tried to run the People Profile report in Secretariat, the **Report Parameter Selection** dialog box featured two empty text fields with no description. The system would prompt the user to provide values for these fields, preventing the user from running the report. The text fields have now been removed.
  Tracking code: UPD-5565

- If the database was set to enforce password policies and Active Directory was configured for a limited number of failed log in attempts, users would be locked out of the database when they ran a Business Objects report from the Reports module.
  Tracking code: UPD-5566

- When a large number of matters was added or updated in eCounsel, the Collaborati Vendors/Timekeepers/Codes/Matters task would return a timeout exception.
  Tracking code: UPD-5695

- The Directors/Officers report in Secretariat does not return the correct data.
Tracking code: UPD-5803, UPD-5578

- In the Secretariat Subsidiary Hierarchy Report, when the option to include Primary Address for the entities is selected, the report only displayed the first line of the address. Now the field expands to include the additional information. Note: When using Oracle and i-net Clear Reports, the report requires the owner schema in order to run. In other words, the database alias must have the schema configured as a user so that it has permissions to display the data.
Tracking code: UPD-5843

- When a user clicked the **View in Suite** option in the Mitratech Office Link plugin to open a Matter and Entity and Invoice summary in the same browser window, the system returned user session errors. Now users can open a Matter and Entity and Invoice summary in the same window without error.
Tracking code: UPD-5846

- When Suite is deployed on Apache Tomcat and has a backslash character (\) in the dataroot URL, users received the following error when running i-net reports:
"java.lang.IllegalArgumentException: Invalid character found in the request target. The valid characters are defined in RFC 7230 and RFC 3986."
Tracking code: UPD-5867

- In hosted environments, when a user created a new CorpChart and clicked **Draw Chart**, the **.VDX** file would not download.
Tracking code: UPD-6327

- If a user unsuccessfully tries to login to Suite Manager twice, Suite Manager closes on the third attempt, regardless if the credentials were correct or not.
Tracking code: UPD-6358

- Custom rules would not execute.
Tracking code: UPD-6410

Dependencies:

This service pack requires the previous installation of the following:

- **suite8.11.0.sp4.1**
- **boxir4-suite8.11.0.sp2.1** if using Business Objects

This service pack includes an update to the following:

- Suite (**suite8.11.0.sp5.1**)
- Suite Manager (**SuiteManager.exe**)
- boxir4 if using Business Objects (**boxir4-suite8.11.0.sp5.1**)

The following scripts need to be run against the database:

- suite8.11.0.sp5.1-Scripts-Oracle
- suite8.11.0.sp5.1-Scripts-SQL Server

This service pack requires the re-import of the following reports, if used:

- Corporate Data Sheet Report
- Subsidiary Hierarchy Report
- Directors/Officers report, if using i-net Clear Reports

MITRATECH

Install Instructions

1. Stop the Bridgeway Suite application on the Java application server.
2. Use Update Manager to install the **suite8.11.0.sp5.1** update. Update Manager will back up the following files:

   - css\home.css
   - javascript\listpagemanager.js
   - WEB-INF\classes\com\bsi\control\BaseCommand$Emailer.class
   - WEB-INF\classes\com\bsi\control\BaseCommand.class
   - WEB-INF\classes\com\bsi\control\ExtServletResponse.class
   - WEB-INF\classes\com\bsi\control\ListCommandViewProfile.class
   - WEB-INF\classes\com\bsi\control\admin\AdminRedirectInitContent.class
   - WEB-INF\classes\com\bsi\control\admin\AppAboutCommand.class
   - WEB-INF\classes\com\bsi\control\admin\GetDatabasesCommand.class
   - WEB-INF\classes\com\bsi\control\admin\GroupListCommand.class
   - WEB-INF\classes\com\bsi\control\admin\GroupSummaryCommand.class
   - WEB-INF\classes\com\bsi\control\admin\GroupSummaryCommandPrint.class
   - WEB-INF\classes\com\bsi\control\admin\RuleProfileListSuiteCommand.class
   - WEB-INF\classes\com\bsi\control\admin\RuleProfileSummaryAndAssociationsCommand.class
   - WEB-INF\classes\com\bsi\control\admin\ToolsCommand.class
   - WEB-INF\classes\com\bsi\control\admin\ToolsCommandOptions.class
   - WEB-INF\classes\com\bsi\control\admin\ToolsUserNodeIterator.class
   - WEB-INF\classes\com\bsi\control\admin\ToolsUserSummaryCommand.class
   - WEB-INF\classes\com\bsi\control\admin\UserListCommand.class
   - WEB-INF\classes\com\bsi\control\admin\ViewProfileSummaryAllToolsCommand.class
   - WEB-INF\classes\com\bsi\control\admin\ViewProfileSummaryAndAssociationsCommand.class
   - WEB-INF\classes\com\bsi\control\report\CrystalReportPromptForViewerCommand.class
   - WEB-INF\classes\com\bsi\control\report\RunReportCommand.class
   - WEB-INF\classes\com\bsi\dataclasses\bsicommon\GroupHelper.class
   - WEB-INF\classes\com\bsi\dataclasses\bsicommon\RuleProfileHelper.class
   - WEB-INF\classes\com\bsi\dataclasses\bsicommon\UsersHelper.class
   - WEB-INF\classes\com\bsi\dataclasses\bsicommon\ViewProfileHelper.class
   - WEB-INF\classes\com\bsi\datalogic\admin\GroupList.class
   - WEB-INF\classes\com\bsi\datalogic\admin\RuleProfileList.class
   - WEB-INF\classes\com\bsi\datalogic\admin\ViewProfileList.class
   - WEB-INF\classes\com\bsi\dataserver\ServerSessionGrabber.class
   - WEB-INF\classes\com\bsi\dataserver\ServerSessionHolder.class
   - WEB-INF\classes\com\bsi\report\CrystalReportPrompter$InvalidPromptException.class

- xsl\bsicommon\viewprofilesummarylist.xsl
- xsl\bsicommon\viewprofilesummaryTools.xsl
- xsl\invoice\invoicesummary_templates.xsl

3. Use Update Manager to install the **boxir4-suite8.11.0.sp5.1** update. Update Manager will back up the following files:

- WEB-INF\classes\com\bridgeway\suite\report\boxir4\servlet\BOCrystalReportServlet.class

4. Restart the Bridgeway Suite application on the Java application server.

Suite Manager Install Instructions

1. Uninstall the current instance of Suite Manager.
2. Extract the files from the **Suite Manager.zip** file.
3. Start the installation program for Suite Manager located in the directory in which the **Suite Manager.EXE** file was extracted.
4. Click **Next** on the **Welcome** screen.
5. On the **License Key** screen, type the license key in the text box and click **Next**.
6. On the **Choose Destination Location** screen, confirm that the Destination Folder is the desired directory location for the program files.
7. On the **Start Installation** screen, click **Next** to begin the installation process.
8. A progress screen will display. You can abort the installation at any time by clicking **Cancel**.
9. On the **Installation Complete** screen, click **Finish**.

Database Function Install Instructions

1. Using your preferred database tool (SQL Server Management Studio, Oracle's RMAN utility, Oracle's export data pump utility, etc.), make a backup of your Suite database.
2. Login to your query tool as an administrative user.
3. Open the appropriate scripts .ZIP file for your database:

- **suite8.11.0.sp5.1.ORA_Scripts.zip** for Oracle databases
- **suite8.11.0.sp5.1.SQL_Scripts.zip** for SQL databases

4. Open and run the SQL script.

Report Template Install Instructions

1. Unzip the appropriate report packages for your configuration, depending on which reports, database, and report server are being used:

- SQL Server or Oracle for your database (the zip files are labeled accordingly)
- i-net Crystal Reports or SAP BusinessObjects for your report server (the zip files for BusinessObjects are labeled BOE)

You will need to reimport each report individually.

2. Open eCounsel and click the **Reports** module.

3. On the **Reports List** page, click the report to be updated and then click the **Reimport** button.

4. On the **Reports** dialog box, browse to the location for the corresponding .RPT file included with this update release and click the **Upload** button.

5. Click **OK** on the message box.

6. Repeat steps 3 through 5 for each report.
