

## TAP Release Notes 1.2.1.6

This page details the bugs that were fixed in the 1.2.1.6 release.

### Resolved Issues

The following items have been resolved in the TAP 1.2.1.6 release. Each issue is documented in the following format:

- **Issue:** A brief description of the bug that was fixed.
- **Tracking Code:** Internal tracking code for internal Mitratech folks to reference.
- **Salesforce Case Number:** Curious if your bug was fixed? Copy your Salesforce case number and search for it on this page.

**Issue:** The NDA Number was not displaying when in *View* mode, even though the value is populated.

**Internal Tracking Code:** TAPSUP-1014

**Salesforce Case Number:** 2019-0511-526532

**Issue:** When user accessed a form from an email link, they never progressed past the loading screen and the form was never submitted.

**Internal Tracking Code:** TAPSUP-1002

**Salesforce Case Number:** 2019-0510-526494

**Issue:** *500 Internal Server Error* occurred when special characters (apostrophe, ampersand, etc.) were used in the *Review NDA* message box.

**Internal Tracking Code:** TAPSUP-971

**Salesforce Case Number:** 2019-0420-522187

**Issue:** The dates found in the *Updated* and *Completed* columns were both updated when any changes (like adding a document to a completed workflow) were made. The *Completed* column should remain the same, while the *Updated* column should reflect the new date.

**Internal Tracking Code:** TAPSUP-909

**Salesforce Case Number:** 2019-0410-520259

**Issue:** Cycling between a normal pinned filter and a pinned filter that uses search functionality caused the filters to hang on the previous one rather than updating the columns and records with the correct filter.

**Internal Tracking Code:** TAPSUP-945

**Salesforce Case Number:** 2019-0404-518926

**Issue:** Async connection to web service caused dashboards to display incorrect data. This issue occurred with pinned filters where the highlighted filter did not align with the data.

**Internal Tracking Code:** TAPSUP-530

**Salesforce Case Number:** 2019-0207-505857

**Note to developers:** This issue was incredibly complex. Please research the ticket listed above, as well as test cases, to get a full, detailed description of the issue and the solution.

**Issue:** When form fields are added to notifications using HTML, they will show a string of code when a "0" is added to the field. However, adding text to the field works just fine.

**Internal Tracking Code:** TAPSUP-1047

**Salesforce Case Number:** 2018-1215-496132

**Issue:** A failed TAP API sync caused an *Unhandled Error* to occur.

**Internal Tracking Code:** TAPSUP-1064

**Salesforce Case Number:** 2019-0509-526191

**Issue:** External API calls failed when using Oauth tokens on workflow Save.

**Internal Tracking Code:** TAPSUP-1606

**Salesforce Case Number:** 2019-0429-523865

**Issue:** Chinese characters displayed incorrectly when generated through the Document Builder.

**Internal Tracking Code:** TAPSUP-965

**Salesforce Case Number:** 2019-0425-523244

**Issue:** TAP workflow designer did not work while using Internet Explorer. While trying to build a form, clients experienced an error while attempting to add fields to a form and switching to the workflow designer.

**Internal Tracking Code:** TAPSUP-964

**Salesforce Case Number:** 2019-0501-524449

**Issue:** When using two signers on the TAP Sign feature within a PDF (not the Document Builder), only the first signer's field will work correctly while the second signer received the document but their signature was not recorded on the PDF and did not show up in the audit trail.

**Internal Tracking Code:** TAPSUP-1157

**Salesforce Case Number:** 2019-0617-534445

**Issue:** TAP Sign is not able to reject a document when the signer is a non-TAP user. User receives an error stating they *do not have permission to modify this workflow*.

**Internal Tracking Code:** TAPSUP-1158

**Salesforce Case Number:** 2019-0613-533742

**Issue:** Stage level visibility permissions reverted back to default permissions, but they are supposed to overwrite default permissions.

**Internal Tracking Code:** TAPSUP-1117

**Salesforce Case Number:** 2019-0612-533310

**Issue:** API calls failed when a workflow with external API calls that used oAuth was Saved. The call failed when the workflow was created, saved, then re-saved. The fail did not happen on the first save.

**Internal Tracking Code:** TAPSUP-1061

**Salesforce Case Number:** 2019-0429-523865

## Known Issues

The issues listed below are known limitations in TAP 1.2.1.6. Our development team is aware of the issue(s) and are working on finding a fix:

- **Known Issue:** A brief description of the bug/issue.
- **Tracking Code:** Internal tracking code for internal Mitratech folks to reference.
- **Salesforce Case Number:** Curious if your bug was reported? Copy your Salesforce case number and search for it on this page.

**Issue:** 500 Internal Error occurs when client tries to enter details and submit a purchase requisition.

**Internal Tracking Code:** TAPSUP-1013

**Salesforce Case Number:** 2019-0327-517090

**Issue:** The Global Search bar fails to return results when entering values from the main fields, and it does not filter properly for Dynamic Fields.

**Internal Tracking Code:** TAPSUP-1003

**Salesforce Case Number:** 2019-0508-525781

**Issue:** A file-parsing error occurs when configuring the *Circle of Trust* for TAP SSO. The error occurs when the client's Identify Provider EntityID URL has an equal sign (=) in it.

**Internal Tracking Code:** TAPSUP-1035

**Salesforce Case Number:** 2019-0510-5263583

**Issue:** TAP Sign is not able to reject a document when the signer is a non-TAP user. User receives an error stating they do not have permission to modify this workflow.

**Internal Tracking Code:** TAPSUP-1158

**Salesforce Case Number:** 2019-0613-533742
