

Release Notes

Document ID: tce_5_0_5

This document details the upgrade information, new features, resolved issues, and known issues that are included in TeamConnect 5.0.5.

1 Upgrading to 5.0.5

You must be using one of the following TeamConnect versions in order to upgrade:

- 3.0 SP1
- 3.0 SP1 Update 1
- 3.1
- 3.1 Update 1
- 3.1 SP1 (including Update 1 and Update 2)
- 3.2 (including Update 1 and Update 2)
- 3.3 (including Update 1 and Update 2)
- 3.3 SP1
- 3.3 SP2
- 3.3 SP3 (including any update from Update 1 through Update 18)
- 3.4 (including any update from Update 1 through Update 8)
- 3.4 SP1 (including any update from Update 1 through Update 20)
- 4.0 (including any update from Update 1 through Update 14)
- 4.1 (including 4.1.1)
- 4.2 (including any update from Update 1 through Update 6)
- 5.0 (including 5.0.3)

To upgrade to TeamConnect 5.0.5, run the TeamConnect Installer as described in the *TeamConnect Enterprise Installation Guide*.

Important: Users upgrading from 5.0 with a SQL Server database should run the upgrade scripts with the database in **autocommit** mode if their instance contains a large number of line items with adjustment types other than 'NONE'.

Note: These release notes assume that users are upgrading from TeamConnect 4.0.9 or later. If you are upgrading from a TeamConnect version prior to 4.0.9, please see the TeamConnect 4.0.9 Release Notes for information necessary upgrade changes and module dependencies.

Document ID: tce_5_0_5

2 Changes and Enhancements

TeamConnect 5.0.5 does not include any net new changes or enhancements. However, users upgrading from versions prior to 5.0.1 are encouraged to read the TeamConnect 5.0.1 Release Notes for changes carried forward from that release.

3 Upgrade Considerations

TeamConnect 5.0.5 supports both JDK 1.7 and 1.8. Similarly, the 5.0.x line supports WebLogic 11g as well as 12c. Later TeamConnect versions (5.1+) will deprecate JDK 1.7. Users seeking to upgrade to 5.1 from this update will need to upgrade to 5.1.1 rather than 5.1.0.

4 Resolved Issues

The following items have been resolved in the 5.0.5 release. Each known issue is documented in the following format:

- A description of the issue
- Internal tracking code
- Case number, if applicable
- Workaround, if applicable

Issue: Any new record created in TeamConnect did not sync with Elastic Search (ES) when the ES server was down.

Tracking code: SUPPORTPRI-34165

Case number: 2017-1115-413430

Workaround: Re-index all objects to force ES 1.7.4 to start indexing changes.

Issue: User still had security rights to a matter even though that user was removed from the matter.

Tracking code: SUPPORTPRI-35636

Case number: 2018-0204-429942

Workaround: Remove the user rights manually from the record.

Release Notes

Document ID: tce_5_0_5

Issue: Error was thrown after user attempted to update the search criteria on a previously-saved Custom Search.

Tracking code: SUPPORTPRI-31532

Case number: 2017-0829-394878

Issue: After upgrading from 3.x to 5.x, the Global Search did not automatically select objects when users clicked the **All** dropdown menu and began typing the name of an object.

Tracking code: SUPPORTPRI-31899

Case number: 2017-0913-398106

Workaround: Manually scroll down the **All** dropdown list and select the object.

Issue: Uploaded PDFs did not download from TeamConnect when Google Chrome was the browser.

Tracking code: SUPPORTPRI-34039

Case number: 2017-1113-412797

Workaround: Check the document out.

Issue: System folder did not have a default category.

Tracking code: SUPPORTPRI-35282

Case number: 2018-0119-426598

Workaround: Use XML document mapping to resolve the issue.

Issue: User was unable to modify and overwrite a saved Custom Search.

Tracking code: SUPPORTPRI-34183

Case number: 2017-1130-416862

Workaround: Create a new search and delete the old one.

Issue: When user selects certain search views and clicks Mass Edit, the system returns an error.

Tracking code: SUPPORTPRI-31651

Case number: 2017-0906-396209

Workaround: Remove fields which belong to another record type from the results.

Release Notes

Document ID: tce_5_0_5

Issue: Uploading documents with special characters (like a semicolon) caused the system to error out when user clicked on the document link.

Tracking code: SUPPORTPRI-33860

Case number: 2017-1102-410324

Workaround: Check the document out before viewing.
