

Release Notes

Document ID: sd_50_i_rn_1

This document details the upgrade information, new features, resolved issues, and known issues that are included in TeamConnect Screen Designer 5.0.

1 Installation and System Requirements

System Requirements

To install TeamConnect Screen Designer 5.0, you must be running the following versions:

- TeamConnect Enterprise 5.0 or later

Java 7 or later is required to run TeamConnect Screen Designer.

Screen Designer runs on versions of Microsoft Windows that support Java 7. For further information on Java 7's system requirements, see the [Java website](#).

Installation

Screen Designer is available for download from the **Available Updates** section of the **About** page in TeamConnect Enterprise. You must have admin user rights to access this page.

To launch Screen Designer

1. Log in to TeamConnect Enterprise as a user with admin rights.
2. Click on the **All** button and select **Admin Settings**.
3. In the left pane, click the **About** link.

The **About** page opens.

4. Click the **Show updates available for installed products** button.

The page displays the modules and versions that are available for your TeamConnect instance.

5. Locate the **TeamConnect Screen Designer** line. Click the download link for your version of Windows (32-bit or 64-bit) to download the Screen Designer zip file.
6. After the Screen Designer zip file finishes downloading, extract it to your desired location.

You will need full user rights to the directory to which you extract Screen Designer. If you extract Screen Designer to an administrator directory, then you will need to run Screen Designer as a Windows administrator user.

7. Open the contained **eclipse.exe** executable file. Screen Designer will launch.
