

Office Suite 3.2.0 Patch 1

Office Suite 3.2.0 Patch 1 Release Notes

TeamConnect[®] Office Suite 3.2.0.1

TeamConnect Office Suite 3.2.0.1 includes the following add-ins:

- TeamConnect Office—Integrates into Microsoft Word, Excel, and PowerPoint.
- TeamConnect Outlook—Integrates into Microsoft Outlook.

You must install each add-in separately. For complete installation and configuration details, see the TeamConnect Office Integration User Guide on the Mitrtech Success site: success.mitrtech.com

System Requirements

TeamConnect Office Suite 3.2.0 Patch 1 has the following system requirements for installing and configuring:

- Must be able to run installer as administrator
- Clients must have .NET Framework 4.5.2 installed **prior to installing this add-in**
- TeamConnect Enterprise 6.0 or TeamConnect Essentials

Note: For TeamConnect Office Suite to work with versions prior to 6.0+, you must install Office Suite versions 2.X. Use the **Available Updates** section of the **About** page. For more information about how to install, refer to “Viewing Information About Available Updates” in the *TeamConnect Administration Guide*.

- IMAP and POP3
- Microsoft Word, Excel, and PowerPoint 2016 and Office 365 Pro Plus (for TeamConnect Office)
- Microsoft Outlook 2016 and Office 365 Pro Plus (for TeamConnect Outlook)

Note: Users must use the appropriate version of the add-in to match their version of Office and Outlook. 32-bit Office/Outlook users should use the 32-bit version of the add-in and 64-bit Office/Outlook users should use the 64-bit version of the add-in

Upgrade Considerations

TeamConnect Office Suite 3.2.0.1 should be installed after uninstalling all previous versions.

Users with versions prior to 2.0 must first upgrade through the 2.0 installer on the **Available Updates** in TeamConnect then upgrade to 3.0.

If you need the installer directly, please reach out to your TeamConnect Administrator.
