Introduction..... 1
Creating a New Publication 1

Introduction

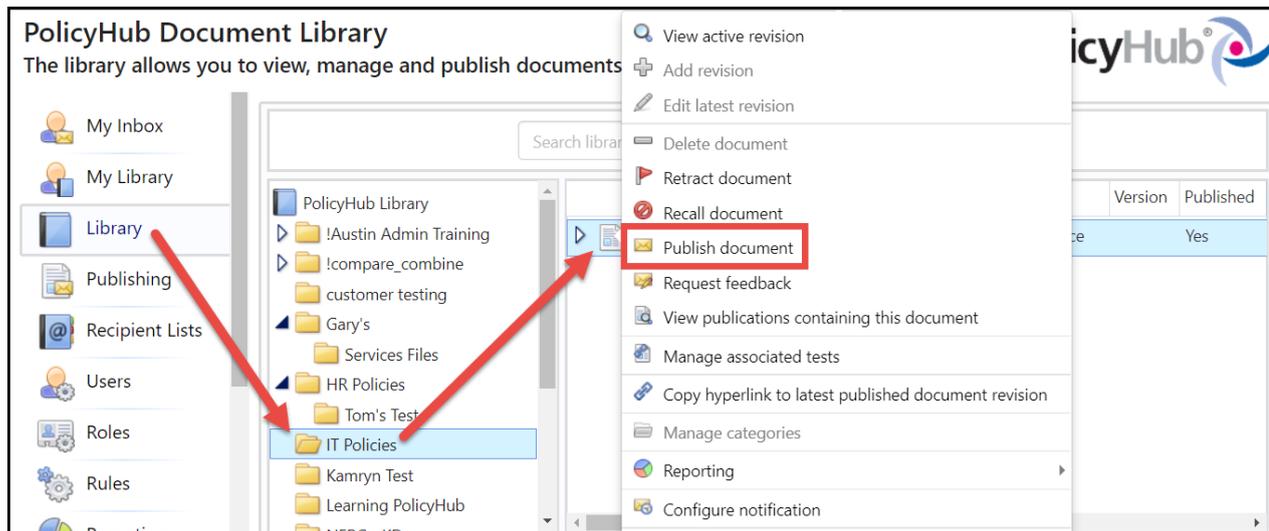

This guide shows how to publish documents. This entails sending documents out to your end-users, either simply uploading them to their library or requiring them to open and attest to having read them.

NOTE: A single Publication may contain any number of documents, tests, and/or questionnaires.

Creating a New Publication

Step 1: Go to the *Library* menu item in the left-hand column:

- Click on the folder that contains at least one of the documents you want to publish.
- Right-click one of the documents you want in your publication.
- In the pop up box click Publish document.

Step 2: Complete the desired fields in the *Publication details* section at the top of the screen, as described below.

Description	Version	Show differences	Publish type	Modified date	Modified by	Used
Employee code of con...	1.07	No	Read document	25/06/2020	Marilyn Stanley	0
Corporate Gifts Questi...	1.01	No	Take questionnaire	09/05/2018	Marilyn Stanley	35
Corporate Gifts Knowl...	1.01	No	Take test	12/03/2018	Marilyn Stanley	80

- Name: Enter a name for the Publication. This name is displayed in the recipient's Inbox – this field is required.
- Source: Person or organization responsible for the publication – this field is required.
- Description: Any further detail you want to add about the publication – this description will be seen by the end-user when clicking the info icon.
- Conversion format: The file format (either Source or PDF) in which you want the end-user to receive the document(s) in the publication – the PDF option is relevant only for Office documents.
- Contact: Email address that you may (optionally) designate as the contact for this publication
- On behalf of: The name of the person or department the Publication is being sent on behalf of.
- Message: The message will be included in the email notification after the standard text when the Publication is sent. (This *Message* is ignored if the rule used has *Send notification message* set to *No.*)
- Allow printing/copying: If you select *Convert to PDF* as the *Conversion format*, this checkbox will display where you can choose to allow the recipients to print the document (By default, *Allow printing/copying* is selected.)
- Send on specific date: By default the Publication is sent when the *Send Publication* button is clicked. When *Send on specific date* is selected, you can configure a date and time when the Publication will be sent. NOTE: If you select *Send on specific date*, you cannot Save a draft publication.
- Include in manager escalation emails: If checked, and the *HR Integration* has been enabled, the publication will be included in the emails to line managers about their compliance status of their team members.
- Allow publication to be completed after rule has expired: Allows the recipients to complete a Compliance Publication after the due date that is defined in the accompanying rule.
- Distribute to new users: If checked, when new Users are added to a *Group* (if the Group is part of your Recipient List), the new users will also be sent the Publication.
- Automatically retract when group membership changes: If checked, when a User is removed from a *Group* (if the Group is part of you Recipient List), the document(s) in the publication will automatically be retracted from the users.
- Use contact as 'From' address for emails: Will use your contact email address as the From address on the email notification. If this tick box is cleared, the default address is used.
- Send status updates to this address: (This option is available for Feedback/Review Publications only.) When this option is selected, the Reviewer will be sent an email when each user finishes their review.
- Pass mark for any included test: (This option is available only when a Test is part of the publication.) Enter a value between 0 and 100. This is the percentage of correct answers the recipient needs to pass the Test.
- Questionnaire submission type: (This option is available only when a Questionnaire has been added to the *Items to be published.*) Select *Not anonymous*, *Optionally anonymous* or *Anonymous*.

Step 3: In the “Items to be published section”, the original item you clicked in Step 1 will already be in the list. If you want to add other documents to your publication click the button *Add documents* in the bottom right hand of the section.

Items to be published

Description	Version	Show differences	Publish type	Modified date	Modified by	Used
Branch Example	1.00	No	Take questionnaire	10/4/2017	Gary Moelk (gary...	0
Creating and Editi...	1.00	No	Read document	10/27/2017	Gary Moelk (gary...	0
Intelligence Test	1.00	No	Take test	10/23/2017	Gary Moelk (gary...	1

Intended recipients

Name	Description	Publication rule	Priority
------	-------------	------------------	----------

Buttons: Add documents, Add recipients, Send publication, Save draft publication, Cancel publication

Step 6: You will be taken to the screen *Select recipients to be used*. Select recipients from the Recipients lists tab (refer to the QRG “Creating and Editing Recipient Lists” for more information if you do not see the Recipient List you need):

- Select the Recipient list that you want to add and then click the Select button at the bottom of the screen (all users in the Recipient list will be selected).

Select recipients to be used

Groups | Recipient lists | Unassigned users

Recipient lists

Name	Description	Active
Production Department	Production Department	Yes
Reviewers	Reviewers	Yes
Root	root	Yes
Services US	Services US	Yes

Selected list members (Production Departmen...)

Type	Name	First name	Surname	Email address
	Jay Sullivan	Jay	Sullivan	jay.sullivan@mitratech.com
	Gary Moelk	Gary	Moelk	gary.moelk@mitratech.com
	Boston Office Users			
	Austin Training			

Buttons: Download to CSV, Create new list, Add to list, Select, Cancel

Step 7: You will be returned to the Build New Publication screen.

- Select a Publication rule for each of the Intended recipients. You may select different rules for each or keep the same rule for all.

NOTE: Priority is important **ONLY** if you have multiple recipient lists where a user falls within more than one list **AND** the rule is different for those Recipient Lists.

NOTE: If you have a Test as part of your publication, you will need to use a Publication rule that contains Test criteria.
