

What's New in PolicyHub 5.5

With the release of **PolicyHub 5.5**, you can now benefit from a powerful set of new features. They provide even greater ease of use and greater assurance in managing documentation and policies across your vendors, contractors and outsourced expertise.

New Features

Third-Party Policy Management

Designed specifically to bring third-parties into PolicyHub, both for sending policies and for inclusion in the review and approval process.

Manual User / Group Management

- Add / Edit / Delete users and groups through the PolicyHub UI
- Add third-party and external accounts
- Provision contractors and send them policies directly from PolicyHub
- Provision external SMEs/outside counsel for policy review and approval

User Synchronization via API

- Provision users and groups using SCIM (System for Cross-domain Identity Management)
- Quick provisioning of users for onboarding
- Enables multiple sources for users

Mixed Authentication

- Multiple SSO provider capability
- SSO and username / password authentication on the same site
- Users can choose how they authenticate
- Highly customizable login page

Custom PDF Viewer

- Consistent experience across browsers
- Ability to prevent users from downloading policies
- Improved hyperlink experience

Greater convenience for you and third parties:

With **PolicyHub 5.5**, now you can add your contractors, SMEs and vendors directly into PolicyHub, and include them into your PolicyHub Review and Approval workflows. This functionality provides easier onboarding and management of policies, assurance that latest versions of documents are being looked at, along with meaningful tracking and reporting on tasks.

Benefits:

- ✔ Send external users their credentials and required policies without having to involve support from IT.
- ✔ External users can work on assigned tasks right within the PolicyHub system.
- ✔ Track attestations, generate reports and send external users reminders to sign off on their policies.
- ✔ Obtain final-sign off from SMEs/ outside counsel by setting them up as an approver to sign off on a policy's content - instantly notifying you that the policy is ready for publishing.
- ✔ Automate the distribution of documents contained within your vendor onboarding pack, which might include latest billing guidelines or technical documentation on your IT infrastructure - ensuring that vendors always have the most up-to-date version.
- ✔ IT infrastructure - ensuring that vendors always have the most up-to-date version.
- ✔ Receive confirmations on vendors' attestation to policies and procedures.
- ✔ Send third parties surveys through PolicyHub as you would for your own internal employees.
