**Tracking Code:** TC-43995

## Known Issues

---

The following items are known issues in the TeamConnect Enterprise® 7.0 Patch 1 release. Each issue is documented in the following format:

- A description of the issue
- Internal tracking code

**Issue:** On My Approvals page, the Invoice Review grid CSS brakes a little if the user applied an existing color profile.

**Description:** If an existing user which has the existing color profile and applies the PS1, Invoice Review grid CSS is broken and not rendering properly. However, when a user uploads the same LESS file again by deleting the existing one it will start working again. For more information, click the [link](#).

**Tracking Code:** TC-44211

**Issue:** Unable to view the Matter Budget Insights block when Invoice is submitted on currency other than USD (System Currency).

**Tracking Code:** TC-43753

**Issue:** On My Approvals and Invoice pages, the date filter won't work if dates are in another language other than English.

**Tracking Code:** TC-43530

---

## INSTALLATION

**Important:** Stop your TeamConnect® instance before updating any files in the TeamConnect® war file.

### 1. Update WAR file

#### Windows GUI:

- Extract patch directory from the .zip file.
- Open the TeamConnect® .war file with 7zip
- Drag and Drop the files from patch directory to .war root in 7zip
- Overwrite file conflicts in 7zip
- Redeploy .war

#### Windows CMD:

- tar -xf <path\_to\_patch\_zip>
- cd <path\_to\_extracted\_directory>
- jar -uvf <path\_to\_war> .\
- Redeploy .war

#### Linux Terminal:

- unzip <path\_to\_patch\_zip> -d <path\_to\_destination\_folder>
- cd <path\_to\_destination\_folder>
- jar -uvf <path\_to\_war> .\
- Redeploy .war

## 2. Below are the settings where the user can configure in application.properties file:

- a. Asynchronous logging enable/disable

```
## async logging, defaults to on, can be disabled app.logging.async=YES
```

- b. Algorithm used for compression

```
## Determines algorithm in use
```

```
## valid values: SHA256, bcrypt
```

```
## if unset, defaults to SHA256 for legacy compatibility encryption.algorithm=bcrypt
```

- c. Number of Iterations used for Encryption:

```
## Determines number of iterations used by the password encryption algorithm
```

```
## for SHA256, must be integer greater than 0
```

```
## for bccrypt, must be between 4 and 31 (recommended around 11)
```

```
encryption.iterations=10
```

## 3. Update database and version information

Use the following steps to update the database and add patch version information to the **About** page of

the **Admin Settings**.

1. Stop the TeamConnect® instance if it is currently running.
2. Backup your TeamConnect® database.
3. Run the script, located in \update, that is appropriate for your database server:
  - a. MSSQL\_TeamConnect\_700\_PatchBundle\_1.sql
  - b. Oracle\_TeamConnect\_700\_PatchBundle\_1.sql
4. Restart TeamConnect®.

## UPGRADE CONSIDERATION

No significant upgrade considerations for this patch

## LEVEL OF RISK TO UPDATE WITH PATCH

LOW
