TeamConnect Data Warehouse
6.3.0 Patch 4
Release Notes

TeamConnect Data Warehouse (PDW6300004) resolves the following issue:

Issue: DWH - ETL fails when Invoice is created and posted between Invoice refresh and Workflow refresh
Tracking Code: SUPPORTPRI-67806
Case Number: 2023-0531-7861428
Reported Version: DW 6.3.0

Workaround
None

Pre-Requisites

- DWH 6.3.0
- Invoice approval workflow on post.

Steps to Reproduce
1. Post the invoice.
2. Change the modified time of the Invoice on Teamconnect DB to future (ex : change the time to 10 min later).
3. Refresh the Data Warehouse.
4. After the modified time passed (Here we have modified it to 10 min) i.e. after 10 min, refresh the Data Warehouse.
5. Check for WH_INVOICE_WORKFLOW table in the Data Warehouse DB.

Expected Results of Steps
Data Warehouse should handle this scenario.

Actual Results of Steps
Data Warehouse job fails.

Root Cause Analysis
Workflow refresh logic is reworked such that it picks records if the respective main object falls under the refresh duration.

INSTALLATION

The following list is a summary of the procedures necessary to install this patch. See the document "PDW6300004_Instructions" for more details.
1. Copy the patch files into their specified locations.
2. Run the WH_upgrade_630P4.bat or .sh file.
3. Run the DWH refresh.

UPGRADE CONSIDERATION

No significant upgrade considerations for this patch.
