IntegrumLive v1.73 Release Notes

Contents

Changes in this Release

IntergrumLive Features & Enhancements

S. No	ID	Description	Platform
1	INTEGRUM-1522	Implemented Document Security/Confidential functionality in the Integrum LiveApp.	Android/iOS
2	INTEGRUM-2217	In the Integrum LiveApp, the parent form displays an incorrect Org Unit 2 dropdown list which has been concatenated from the Org Unit 1 field.	Android/iOS

Error Corrections

S. No	ID	Description	Platform
1	INTEGRUM-1441	When a user tries to add OU fields while creating a form, Integrum LiveApp does not display OU fields below level 4. The user is able to add OU fields only till level 4.	Android/iOS
2	INTEGRUM-1442	When a subform is created from a parent form, Integrum LiveApp allows approving the parent form without approving/completing the subform.	Android/iOS
3	INTEGRUM-1519	In the Integrum LiveApp, after launching and submitting the parent form to the MR, a subfield is missing for a question in the parent form.	Android/iOS
4	INTEGRUM-1521	After launching a subform on the Integrum LiveApp, the user is unable to scroll and choose any value from a single selection dropdown list for a field.	Android
5	INTEGRUM-1523	When a user tries to reopen a smartform, the Integrum LiveApp displays an error message "failed!Error: MethodNotesSession.createDateTime (undefined) not found, or illegal parameters".	Android
6	INTEGRUM-1525	The Integrum LiveApp user is unable to select a value from the single selection dropdown list for the field in a MicroDB.	Android
7	INTEGRUM-1528	When a user clicks on the add button of a section in the parent form, the app displays an empty pop-up.	Android
8	INTEGRUM-1529	The integrum LiveApp displays an incorrect start date value as "date man ui-sortable-handle" instead of displaying the proper date under a section in the smartform.	Android
9	INTEGRUM-1576	The user is unable to select the value as the dropdown values are not populated when a radio button is selected under a field in the parent form.	iOS
10	INTEGRUM-1577	The Integrum LiveApp displays the incorrect status of a subform as completed instead of the draft when a subform is opened.	iOS
11	INTEGRUM-2227	In the offline/online mode of an Integrum LiveApp, the headline section of all forms should be extended horizontally throughout the screen instead of the wrapped text.	Android
12	INTEGRUM-2249	In the offline/online mode of an Integrum LiveApp, the "Upload an attachment" field font size differs from other fields in a smartform.	Android
13	INTEGRUM-2259	In the smartform, the text colour of the user input field is displayed in grey color instead of black.	Android

14	INTEGRUM-2391	In the Integrum LiveApp, when a user opens any parent form view register, the historical forms listed do not display the black folder icon indicating subforms were raised.	iOS
15	INTEGRUM-2393	When a user opens View Register in an Integrum LiveApp, the Org Unit structure is displayed incorrectly. This has now been fixed.	Android/iOS
16	INTEGRUM-2470	In the Integrum LiveApp, when a user raises/submits a subform, it does not get linked to the parent form and displays no status.	iOS
17	INTSUP-1356	When a user logs in via SSO login, logs out and logs in again via SSO login the Integrum LiveApp displays a "Request timed out" message and does not allow the user to log in.	Android
