

---

This document details the upgrade information, new features, resolved issues, and known issues that are included in TeamConnect Enterprise® 7.1

## 1 System Requirements

---

Before you begin to install TeamConnect 7.1, ensure that your system meets the requirements. For a full list of requirements, refer to the Installation Requirements in the TeamConnect Enterprise 7.1 Installation Guide.

The following versions of TeamConnect can be upgraded to TeamConnect 7.1

- TeamConnect 5.0 (through 5.0.10)
- TeamConnect 5.1 (through 5.1.1)
- TeamConnect 5.2 (through 5.2.10)
- TeamConnect 6.0 (through 6.0.2)
- TeamConnect 6.1 (through 6.1.2)
- TeamConnect 6.2 (through 6.2.6)
- TeamConnect 6.3 (through 6.3.7)
- TeamConnect 7.0

TeamConnect 7.1 is designed to pair with the following versions of modules (notes below reflect the available versions as of the TeamConnect 7.1 release date):

- AP Link 5.1
- TC Business Intelligence 6.3.0
- Collaborati Spend Management (CSM) 7.1
- Data Warehouse 7.0
- Deadlines 5.1.1 + Patches 1-2
- Financial Management 6.3.1 + Patch 1-2
- Legal Matter Management 5.0.1 + Patches 1-6
- Office Suite 3.3.0 + Patches 1-2
- Screen Designer 5.2.1
- Service of Process (SOP) Manager 7.1
- TC Essentials 6.3.1
- TeamConnect-TAP Integration 1.1
- TeamConnect O365 Add-In 4.0
- Global Search Connector 1.0
- Please visit the [3rd Party Software Matrix](#) for version compatibility information for Elasticsearch, App Servers, etc.

## 2 Upgrade Considerations

---

- TeamConnect 7.1 is only certified against **Elasticsearch 8.6.2**.
- TeamConnect 7.1 is only certified against **B04.3SP2**
- Introducing **TeamConnect Global Search Connector 1.0** – a new module aimed at simplifying ElasticSearch upgrades. Before testing the connection between TeamConnect and ElasticSearch, please ensure that you have installed the ElasticSearch Connector module. You can find this module listed under available updates in TeamConnect.
- Supports **Websphere Liberty 22.0.0.1**

The following modules are rolled out along with the release, which will require upgrading to ensure compatibility with TeamConnect Enterprise® 7.1.

- [TeamConnect O365 Add-In 4.0](#)
- [Global Search Connector 1.0](#)
- [Collaborati Spend Management 7.1](#)
- [Service of Process \(SOP\) Manager 7.1](#)
- [InvoiceIQ 2.0](#) (We recommend to upgrade)

## 3 Enhancement/Features

---

### Custom Color Profile, TeamConnect Troubleshooting & Debugging Improvements

TeamConnect Enterprises 7.1 introduces several new features, focusing on Custom Color Profile and enhanced Troubleshooting & Debugging Improvements for the better user experience.

These new features of [Custom Color Profile](#) introduce new functionalities, eliminating the need for time-consuming tasks like deleting or renaming color profiles. It also includes options for recompiling and uploading improved color profiles, streamlining the entire process. In addition, we have introduced [Enhanced Color Profile Administration](#) which provides the usage of CSS variables.

TeamConnect Troubleshooting Improvements introduces the following new features:

- Introduced a new rollover policy called "[Rollover by Schedule & Size](#)", enabling users to efficiently manage logs by incorporating both schedule and size criteria.
- Introduced a new feature called the "[Rule Auditor](#)", which lists rule failures during execution. This feature aids in diagnosing and resolving issues related to rule failures.
- Introduced new [Block Identifiers](#), enabling users to view both the block name and block key during the rendering of custom blocks. This enhancement helps users identify problematic blocks when diagnosing issues.
- Introduced Notifications for [Scheduled Action failures](#), eliminating the need for manual entry each time a new scheduled action is created. Users can specify an email address during the scheduled action setup to receive notifications if the action fails.
- Introduced a new setting named "[Max Search Time for Report](#)", designed as a distinct field to manage the timeout duration for report execution. This prevents any interference or issues with custom search functionality.

**Enhancement:** New Custom variables must be added to the "DefaultCustomVariables.LESS" file.

**Description:** A fallback variables import system has been introduced to TeamConnect for LESS files. Any newly introduced variables in future TeamConnect versions & missing variables will not cause problems or breakages with the client's custom LESS file as there will be default values assigned through the import system. For more information, click [here](#).

**Tracking Code:** TC-42811

**Enhancement:** Automatically recompile Custom Color profile .LESS File, when clients upgrade.

**Description:** When the admin runs the upgrade script, an option is introduced to toggle/control the recompilation process automatically for all the color profiles on initial startup. For more information, click [here](#).

**Tracking Code:** TC-42810

**Enhancement:** Separate Max Search Time for Reporting & Custom Search.

**Description:** Introduced a new field called "Max Search Time for Report" when an admin wants a separate setting in Admin > Admin Settings > Reporting tab > "Max Search Time for Report", to control the timeout for report execution so that it does not interfere with custom search and does not cause problems with custom search. For more information, click [here](#).

**Tracking Code:** TC-43694

**Enhancement:** Modify Block Title "Company Settings" on Admin Settings/UserInterface.

**Description:** The block name "Company Settings" is modified as "Logo Management" For more information, click [here](#).

**Tracking Code:** TC-44914

**Enhancement:** On Screen text when user doesn't have permission to document tab.

**Description:** Users who don't have permission to add documents will not be able to upload a new color profile because those are stored in documents folders. For more information, click [here](#).

**Tracking Code:** TC-44997

**Enhancement:** Rule Auditor: Retrieve and display rule failures in New Rule Auditor User Interface.

**Description:** The user can view the list of rule failures in the Rule Auditor table to diagnose and troubleshoot issues related to rule failures. For more information, click [here](#).

**Tracking Code:** TC-46024

**Enhancement:** Access Rolled Over Logs from User Interface.

**Description:** Users who have access to view logs can now retrieve the last 14 instances of rolled logs from the logging screen.

When estimating file size, values are rounded to the nearest KB/MB. If a user upgrades from a previous version of TCE to TCE 7.1, the last 14 Archived logs are not displayed. For more information, click [here](#).

**Tracking Code:** TC-45515

**Enhancement:** Add Block Identifiers to Logs.

**Description:** The user can view both the block name and the block key when a custom block is displayed. This feature helps users identify problematic blocks while diagnosing issues related to them. For more information, click [here](#).

**Tracking Code:** TC-43691

**Enhancement:** Rule Auditor: Create an entry for Rule Auditor in the Tools dropdown.

**Description:** Users or administrators can access the Rule Auditor via the Tools dropdown. Clicking on it opens a new tab specific to Rule Auditor, where they can view a list of rule failures and their details. For more information, click [here](#).

**Tracking Code:** TC-46022

**Enhancement:** Appenders from TeamConnect in setup should have View Archived logs functionality.

**Description:** Appenders within TeamConnect feature the "View Archived Logs" functionality, but this capability is not available for external appenders. Specifically, external appenders such as those loaded via documents, SMTP, Socket, and CSM do not support the "View Logs" feature. Additionally, only the File Appender includes the "View Archived Logs" functionality. For more information, click [here](#).

**Tracking Code:** TC-45978

**Enhancement:** Create a new CSM (Collaborati spend Management) logger and Integration Logger.

**Description:** Users have the ability to configure the CSM log independently from the Rule logger or any other logger. This configuration allows them to debug rules or other logger issues without CSM cluttering the logs with unnecessary information. Starting from TeamConnect Enterprise version 7.1, CSM logging will be directed to the Integration Logger.

It's important to note that upgrading to CSM 7.1 will require an upgrade to TCE 7.1. For more information, click [here](#).

**Tracking Code:** TC-43693

**Enhancement:** In My Approvals page, display spinner text when switching between freeze / unfreeze options.

**Description:** As the user toggles between the freeze and unfreeze header options, a spinner and accompanying text will appear while the My Approvals page loads. For more information, click [here](#).

**Tracking Code:** TC-48006

**Enhancement:** In the Invoice page, display spinner text when switching between freeze/unfreeze options.

**Description:** When the user switches between the freeze / unfreeze header options, the spinner and text will be displayed as the page loads in the Invoice page. For more information, click [here](#).

**Tracking Code:** TC-47443

**Enhancement:** Scheduled Actions: To send notification when scheduled actions job fails.

**Description:** Users can provide an email address when creating a scheduled action, allowing them to receive notifications in case the scheduled action fails. For more information, click [here](#).

**Tracking Code:** TC-44912

**Enhancement:** Default email Setting for scheduled actions email notification.

**Description:** Users can set a default email address for scheduled actions, eliminating the need to manually enter their address each time they create a new scheduled action. Once this setting is configured, the email address field will automatically be filled with the default address when the user accesses the scheduled actions page. For more information, click [here](#).

**Tracking Code:** TC-46807

**Enhancement:** Enabling "Clearlog" and "Rollover" hyperlink for the Option "Rollover by size and schedule" in File Appender type.

**Description:** The user can enable the "Roll Over" and "Clear Log" options in the File appender type in the Setup while choosing "Roll over by size & schedule", so that they can perform the required actions. For more information, click [here](#).

**Tracking Code:** TC-49213

**Enhancement:** If the file name includes "/" or "\", then a new directory is created which is being skipped in the archived logs for File appender.

**Description:** If the user includes special characters like "/" or "\" in the file name within the file appender, folders can be viewed in the archived popup. The contents of the subfolders created under the file name (which includes rolled-over logs) will also appear in the archived logs popup. Users can download these contents as a zip file. For more information, click [here](#).

**Tracking Code:** TC-48547

**Enhancement:** Invalid special characters in the file appender name.

**Description:** Avoid using the following special characters in the file name when navigating to Setup > System Settings > System Appender > File Appender Information > File Name.

! @ # \$ % ^ & ( ) + \_ - = { } [ ] | : ' " , ? ` ~ ; ' " , ?

For more information, click [here](#).

**Tracking Code:** TC-48882

**Improvement:** Hover over Copy & Close in the title attribute.

**Description:** Users can hover the mouse over the title icon of the "View Details" popup for a specific rule failure. This action allows the user to copy or close the popup using the icon's clear and explicit information. For more information, click [here](#).

**Tracking Code:** TC-48972

## Custom Search Updates

This release address the following Improvements/Enhancements for [Custom Search Management in TeamConnect](#):

- Improved custom search and search view management by empowering users to categorize their searches into folders, offering a more personalized and organized experience.
- Empower administrators to produce and distribute replicas of personalized searches through search views, incorporating filtering options such as "All of the following," "Any of the following," and "Group the following."
- Allow administrators to adjust the order of group-assigned search views on the user interface directly from the setup window.
- Enhanced the user interface block for assigning search views to groups, enabling administrators to easily unsubscribe search views for a specific group of users directly from the setup window.

**Enhancement:** Label changes to Manage Collections screen.

**Description:** In TeamConnects Manage Collections section the user interface for Projects, Contacts, Accounts, Invoices, Appointments, Tasks, Documents, Expenses, and History objects has been updated. The <Object> Manage Collections, Object Collections (Pagination label), and Manage List header all these labels are updated to Manage Searches.

**Tracking Code:** TC-43992

**Improvement:** New users should not be subscribed to all the search views.

**Description:** When an admin creates a new user, the user is automatically subscribed only to the search views assigned to their user group. This will save admins time by eliminating the need to manually unsubscribe search views that are not relevant to the user.

**Tracking Code:** TC-46679

**Enhancement:** The ability to manage Custom Searches along with Search View Collections on the Manage Collections pages for each object.

**Description:** A new user interface block called "Manage Custom Searches" has been introduced on the Manage Collections screen. This block includes buttons for creating a new folder and moving items, along with a table displaying Custom Searches, featuring a fixed column.

**Tracking Code:** TC-40810

**Enhancement:** Populate Custom Search Data and Folders for Contacts Manage custom search block.

**Description:**

- Upon opening the Manage Custom Searches screen, users will see a list of saved Custom Searches and Folders specifically created for the Contact object.
- The saved custom searches are presented in a table format, featuring columns for Order, Name, Description, and Created on.
- Folders are displayed above the custom searches. In case of identical order values, both folders and custom searches are sorted alphabetically.

**Tracking Code:** TC-39172, TC-43951

**Enhancement:** Implement breadcrumb component for Contact's Manage custom search block.

**Description:** User interface elements such as location breadcrumbs are now positioned beneath the button bar within the Manage Custom Search block. These breadcrumbs indicate the folder levels users are navigating.

All breadcrumbs are clickable links; selecting one redirects users to the corresponding folder location. The folder locations are indicated by right-pointing double angle quotation marks.

**Tracking Code:** TC-44148

**Enhancement:** Update Contact Save Search dialog to include a description & folder selection.

**Description:** The Save Search header is now labeled as Search Information, the Save as field is renamed as Name, and the Save button is modified to Save Search.

**Tracking Code:** TC-40851

**Enhancement:** Allow users to enter description for Contact's search views.

**Description:** A memo field has been incorporated into the search view across all objects on the TeamConnect Setup screen. Users have the option to add or modify the description for a search view; it's not mandatory. If a user exceeds the character limit (2000 characters) in the description field, an error message will appear on the screen. Any added or updated descriptions will be stored in the database, and the changes will be reflected in the description field of the Manage Custom Search block.

**Tracking Code:** TC-44971

**Enhancement:** Implement unsubscribe button for Manage Collections.

**Description:** In the Manage Collections block for TeamConnect objects, a new checkbox column and an Unsubscribe button have been introduced. Initially disabled, the Unsubscribe

button becomes active once the user selects the corresponding checkbox in the grid. Clicking the Unsubscribe button will remove the user from the selected search view.

**Tracking Code:** TC-44122

**Enhancement:** Add Allow unsubscribe column on Manage collections table.

**Description:** In the Manage Collections table, a new column titled "Allow UnSubscribe" has been introduced. Users can now ascertain their ability to unsubscribe from search views based on the value in this column. If the "Allow Subscribe" column is marked as Yes, it indicates that the selected search view and address book have been manually subscribed. Search views subscribed to a group will display No in the "Allow Subscribe" column.

**Tracking Code:** TC-48031

**Enhancement:** User Interface changes to design of group assignment of search views in the setup search views pages.

**Description:** Admins previously faced challenges in identifying which search views were assigned to specific groups. This issue has been addressed through the introduction of a new User Interface block on the search view screen. When admins choose the object collections option on the Search Views screen, a new block appears at the page's bottom. It disappears if the administrator deselects it.

Within this block, admins can assign and unassign search views for user-related groups. Additionally, admins can check the assignment status of search views (Yes or No) to user groups in the Assigned column of the tables.

**Tracking Code:** TC-47105, TC-46682

**Enhancement:** Reminder for admins to save their changes.

**Description:**

- A new reminder added above the Object Collection Group Assignment section that states, *"Please save the above changes before attempting to Assign/Unassign in the Object Collection Group Assignment section"*.
- The provided reminder enables admins to save changes and avoid receiving error messages when assigning a group without saving. If an admin tries to assign a group that is already assigned, an error message will be displayed.

**Tracking Code:** TC-47294

**Enhancement:** Add All of the following, Any of the following and Group the following in search view in the Search qualifiers in the setup search views pages.

**Description:** A new Group field is now available in the Search Qualifiers table on the TeamConnect setup page, allowing administrators to assign distinct groups for search qualifiers. When administrators choose the "Group the Following" option while adding the search qualifier,

an empty Group field appears in the table; it vanishes when any other option is selected. If administrators input a value outside the range of 1-9 or 0 in the Group field during the addition or editing of a search qualifier, an error message will be displayed. At the top of the Search Qualifiers table, administrators can choose from three radio options. There are

- All of the following
- Any of the following
- Group the following

**Tracking Code:** TC-47536

**Enhancement:** Add "Group" field on the filter criteria for users on the User Interface.

**Description:** The user interface for the Search view has been updated by adding the Group field to the filter criteria. This group field will display when the user selects "Group the following" as logic on the user interface.

If "Any of the Following" or "All of the Following" is chosen as the logic, the group field will disappear on the user interface. On the search views screen, users will not be able to modify the Group field value.

**Tracking Code:** TC-47537

**Enhancement:** Testing of Duplicate field validation in "All of the following" criteria in filters.

**Description:** If admins choose "All of the following" on the search filters screen and add duplicate fields, they will encounter an error message. However, if they select both "All of the following" and "Group the following" in the search filters and add, edit, or delete duplicate or existing fields, no error messages will be displayed. When users perform the search, the results will be generated based on the settings configured by admins, even if there are duplicate fields.

**Tracking Code:** TC-48212

**Enhancement:** On Contacts Object Cascade unsubscribe from setup for admins.

**Description:** If a user lacks the necessary system rights to unsubscribe from a search view, the administrator must handle the unsubscription process by selecting the user group. If an admin removes a group assignment from the search view, this action will affect all users within that group, impacting both individual user and group-level entries.

**Tracking Code:** TC-48205

## Outlook Add-in Updates

This release address the following improvements/Enhancements of TeamConnect O365 Add-In 4.0:

- **Email and Communication:** The Add-in facilitates efficient tracking and organization of emails related to matters and documents within TeamConnect.
- **Calendar Integration:** A standout feature is the synchronization of appointments between Outlook and TeamConnect, ensuring that all schedules are up to date.
- **Document Handling:** Users can access and manage TeamConnect documents without leaving the Outlook interface.
- **User-Friendly Interface:** The Add-in offers an intuitive and user-friendly interface for quick and easy access to TeamConnect data.
- **Enhanced Efficiency:** The integration eliminates the need to switch between applications, saving time and promoting effective collaboration.

Kindly go to [TeamConnect 0365 Add-In Help](#) to access the respective guides in the Client Success Center.

For those managing appointments in TeamConnect, the Outlook Add-in is a powerful ally. It streamlines the process of scheduling, tracking, and managing appointments, ensuring that your calendar stays in sync with your TeamConnect data. For more information on appointments, refer to the [End User Guide](#).

Overall, the TeamConnect Outlook Add-in offers a robust solution for legal professionals and others looking to optimize their workflow and maximize the benefits of the TeamConnect platform.

## Idea Portal

---

The following feature ideas are taken from [Idea portal](#) or direct client feedback. We have implemented these ideas in the TCE 7.1 release:

**Enhancement:** In the TeamConnect O365 Add-In 4.0, an option to rename the file or upload as a version of an existing file in the duplicate detection error (Covers Copy & Paste in same folder).

**Description:** When a user uploads a file via the TeamConnect O365 Add-In 4.0, the system checks for duplicates. If the same file name is found in the destination folder, it prompts the user with three options: rename the file, upload as a new version, or cancel.

If multiple files are uploaded, the user can choose to copy or upload as new versions when duplicates are detected. The system also updates file details like version number, modified date, and user information accordingly.

**Tracking Code:** TC-39625

**Enhancement:** New Default Log Rollover policy in Setup.

**Description:** The user can access a new Rollover Policy called "Rollover by Schedule and Size" in the setup screen under the "File Appender Section" dropdown. For more information, click [here](#).

**Tracking Code:** TC-43696

**Enhancement:** Modify Log Roll over policy.

**Description:** When a user selects 'Rollover by Schedule and Size' option for either a new appender or any existing appender, the logs must roll over if the size of the current logs exceeds the value in the max. fileSize (MB) field OR if the backup schedule condition is triggered (whichever condition is triggered first). For more information, click [here](#).

**Tracking Code:** TC-45691

**Enhancement:** Clear & Rollover Options.

**Description:** In the Admin Settings section, specifically under Logging > System Appenders and Audit Appenders, users have the option to either "Clear" the log instantly or "Rollover" it based on the specified policy regarding size and schedule.

This enables users to either delete the log immediately by clicking "Clear" or preserve it and delete it later by choosing "Rollover." For more information, click [here](#).

**Tracking Code:** TC-45699

**Enhancement:** Ability to recompile existing color profiles uploaded from the "Upload Color Profile" button.

**Description:** Users can reupload existing color profiles now. After reuploading, the user needs to refresh their browser cache by "ctrl+shift+r" and the older color profile will not be retained as a version. The newly uploaded color profile will override the previous color profile. For more information, click [here](#).

**Tracking Code:** TC-44472

**Enhancement:** Create a new button that triggers recompilation on the Admin / User Interface page.

**Description:** If a user makes any additional changes to existing color profile, a new button called "Recompile" is provided to recompile that modified color profile thereby eliminating the existing cumbersome process of deleting profile or renaming it. For more information, click [here](#).

**Tracking Code:** TC-42932

**Enhancement:** Option to Recompile All existing Color Profiles.

**Description:** For recompiling multiple files at once, the user will be provided with an option to choose "ALL" in the "Recompile Color Profiles" dropdown. For more information, click [here](#).

**Tracking Code:** TC-43396

**Enhancement:** Dialogue popup for "Recompile All" and improved banner message.

**Description:** When an admin initiates a recompile all process, a dialogue box with a warning appears as "Recompiling all color profiles may take a few minutes. You will not be able to perform any action during the recompilation process. Are you sure you want to proceed?" with the options to "Recompile All" and "Cancel" buttons. For more information, click [here](#).

**Tracking Code:** TC-44570

**Enhancement:** Download Archived Logs under Admin>Logging>System Appenders.

**Description:** When the user selects the download option, the corresponding log will be saved. For existing users utilizing specific scripts to archive their logs, the log file name will be modified to the formats mentioned below.

Example File Name for Rollover by Size & Schedule: **system.log.2023-02-24.1768987654234**

Example File Name for Rollover by Schedule: **system.log.2023-02-24**

Example File Name for Rollover by Size: **system.log.1**

**Tracking Code:** TC-45692

**Enhancement:** User Interface for creating a New Folder in Contacts Manage Searches and Manage Collections block.

**Description:** In the Manage Custom Searches and Manage collections block, New Folder button has been added to the user interface. When the user clicks on the New Folder button a dialog box will appear with two input boxes named as Name and Description with Create Folder and Cancel buttons on the screen.

**Tracking Code:** TC-40953, TC-44945

**Enhancement:** Allow users to arrange saved folders, Custom Searches, and Search Views in any order they choose on Contacts Manage Custom Searches and Manage Collections block.

**Description:** Users can change the value of the order by entering a numeric value in the order field and then clicking the "Update" button in the header.

Searches and folders are sorted in accordance with the updated order value when users update the order value. Notably, they are sorted alphabetically if the order value is the same.

**Tracking Code:** TC-39179, TC-44959

**Enhancement:** User Interface for Contacts Move Button popup.

**Description:** When a user clicks the Move button, a popup with a drop-down menu will display on the screen, which allows users to choose the folder to which custom searches or search views should be relocated.

This popup will include interface elements such as Folder, Description, Move, and Cancel. Clicking the Move or Cancel buttons will close the popup and take the user back to the previous screen.

**Tracking Code:** TC-44097

**Enhancement:** Move Contacts custom searches and search views inside folders.

**Description:** Users can relocate saved Custom Searches or search views between folders by choosing the folders in the table and clicking the Move button. When a user selects a custom search, the initially disabled Move button becomes active. Upon clicking it, a popup with a drop-down menu appears, allowing users to pick the destination folder for the custom searches.

**Tracking Code:** TC-39177

**Enhancement:** Move Contact Custom searches and search views back to root level.

**Description:** Users can choose to either Remove from Folder or Move saved searches/views from saved folders to root-level folders. Clicking on the "Remove from Folder" button prompts a warning box with "Confirm" and "Cancel" options. After user confirmation, the selected saved search is removed and transferred back to the Root folder. Upon successful relocation, a

confirmation message will be displayed on the screen.

**Tracking Code:** TC-44247, TC-44947

**Enhancement:** User Interface update for Contact's Manage Custom Search Action column.

**Description:** The Manage Custom Searches and Collections table is enhanced by introducing an Action Column on the Manage Searches screen. Within this column, there are two icons representing custom searches and folders (Edit Info, Delete). Hovering over these icons triggers tooltips to appear on the screen. Notably, the Action column is visible only at the root level and remains hidden within folders.

**Tracking Code:** TC-40952, TC-45217

**Enhancement:** Allow users to delete on Contact Manage Custom Searches and Manage Collections block.

**Description:** Within the Contacts Manage Searches screen, users have the option to delete saved Custom Searches and folders. Clicking the Delete button in the action column prompts a pop-up window to appear, offering options Yes and No. Once confirmed by the user, the deletion will be carried out, and a success message will be displayed on the screen after the process is successfully completed.

When a user deletes a folder containing Custom searches, all the searches within the folder are deleted.

When a user deletes a folder containing search views, all the search views are moved to the Root level.

**Tracking Code:** TC-45097, TC-39175

**Enhancement:** Enhance search management for all the objects in TeamConnect.

**Description:** The improved search management for Custom Searches now covers all objects within TeamConnect. On the <Object> Manage Searches page, users will find the Manage Custom Search and Manage Collections blocks, showcasing existing custom searches and views for all TeamConnect objects.

Users can perform various actions such as creating new folders, editing, moving, deleting, subscribing, unsubscribing, and updating the order for search views and custom searches.

Additionally, the breadcrumb components allow users to navigate back to the root folder from any level where they are working.

**Tracking Code:**

TC-40955,TC-45135,TC-40958,TC-40962,TC-40956,TC-40960,TC-40961,TC-40957, TC-40959

**Enhancement:** Revise the user interface located on the left navigation panel for the objects within TeamConnect.

**Description:**The user interface on the Objects left navigation panel has been enhanced. Changes made to the Manage Custom Search and Manage Collections block will now be visible

on the Objects Left Navigation Panel, featuring both collapse and expand options. Folders are consistently displayed above searches and views.

All the folders/searches are clickable. When a user clicks on Folder, it is either expanded or collapsed. When a user clicks on search/view it is executed. The selection by the user will be highlighted on the left nav menu.

**Tracking Code:** TC-39220, TC-46962

**Enhancement:** Allow users to edit on contacts Manage Custom Searches and Collections blocks.

**Description:** On Contacts Manage Searches screen, users can edit the saved Custom Searches, Search Views, and folders. Clicking the edit icon in the action column opens a popup window titled "Update Information." Within this popup, users encounter two editable fields: Name and Description, alongside two buttons, labeled "Update Info" and "Cancel."

To update information, users can click the "Update Info" button, which will change the modified date to the current date and show the updated details on the screen. Upon successful update, a confirmation message will be displayed.

**Tracking Code:** TC-39222, TC-44955, TC-47433

**Enhancement:** Contact's Order propagation from setup to Manage collections.

**Description:** In the Object Definitions screen, the order value set by administrators during the setup of Search Views will be carried over to the order value Contact's object definition setup screen.

- The Manage Collections table will display the default order value of a search view when users manually unsubscribe from the view.
- When the user updates the order value for the search views on the Manage collections table, the order value will be updated and the search views are arranged in accordance with the updated order value.
- By selecting any specific copy of group assigned search views and clicking on Unsubscribe button, the group assigned search views can be unsubscribed and the order value in the table will be default to the value set by the admins.
- The order value will be reset to zero when users move the search views into a new folder.

**Tracking Code:** TC-48533

## 4 Resolved Issues

---

The following items have been resolved in the TeamConnect Enterprise® 7.1 release. Each issue is documented in the following format:

- A description of the issue
- Internal tracking code
- Case number, if applicable
- Initial fix version

**Issue:** Issue with qualifier of Custom Action Rule where a warning message is displayed if “Billing End Date” is greater than “X” days

**Tracking Code:** TC-45291

**Case number:** 2019-0116-500920

**Issue:** Audit Rule triggers an Error which states it is an Approval Rule.

**Tracking Code:** TC-45288

**Case number:** 2018-0412-444680

**Issue:** When recovering a session and attempting to create and save an involved party object, a null pointer popup occurs.

**Description:** A null pointer popup error occurs when attempting to create and save an involved party child object. However, “recover session” does not allow the user to create anything in setup. It will, however, allow users to delete without issue.

When opting to recover the session, the Teamconnect session's client session is getting invalidated and the unit of work is treated as null. The user needs to update the new unit of work and the client session to the old Teamconnect session.

**Workaround:** The user must log out and then log back in to begin a new session.

**Tracking Code:** TC-44982

**Case number:** 2018-0613-457849

**Issue:** Invoice Route Details not getting Loaded from Action Tab.

**Tracking Code:** TC-45013

**Case number:** 2017-1205-417846

**Issue:** Invoice > Interactive Line Items > Inconsistent scrollbar within a scrollbar for certain line items that contain Warnings.

## 5 Known Issues

---

The following items are known issues in the TeamConnect Enterprise® 7.1 release. For more detailed information of the issues documented below, refer to [TCE 7.1 Known Issues](#). Each issue is documented in the following format:

- A description of the issue
- Internal tracking code

**Issue:** The global search results are not aligning with the maximum search results configured in the admin settings.

**Tracking Code:** TC-49538

**Issue:** When the primary address has been deleted from the contact, a duplicate address is getting added.

**Tracking Code:** TC-48357

**Issue:** The Total Row footer shows currency symbols for percentage values.

**Description:** For a number column having a percentage (%) format, the totals row (footer row) shows the total with a currency symbol.

**Tracking Code:** TC-49692

**Issue:** Getting gateway timeout error when we are compiling 16 color profile

**Tracking Code:** TC-49674

**Issue:** The Right argument value of a rule qualifier is saved as “From Any Value To This Value NO” when the user selects Operator as “Is Changed” and Right Argument as “From Any Value To Any Value” for a Custom Checkbox field.

**Tracking Code:** TC-45929

**Issue:** When a user clicks on saved custom searches in the left navigation menu of the manage searches page, they are redirected to the custom searches screen.

**Tracking Code:** TC-48936

**Issue:** Issue with Group the Following for Contacts object.

**Description:** The Group the following option does not show expected results for the filters added in filter criteria for the contact's object.

**Tracking Code:** TC-48479

**Issue:** When "(", ")" is entered in group value fields, error messages are not displayed in the same format.

**Tracking Code:** TC-48003

**Issue:** Criteria containing relative fields and related object fields are not displayed when the user interface displays an error message.

**Tracking Code:** TC-47993

**Issue:** When the user edits multiple group value fields and attempts to save them for the row in the table, the edited value cannot be saved.

**Tracking Code:** TC-47992

**Issue:** If the administrator edits multiple group value fields to any character, an error message displays and the changes cannot be canceled.

**Tracking Code:** TC-47987

**Issue:** When a user selects an assigned group (which is YES) and an unassigned group (which is NO), the unassigned group should be assigned and an error message should be displayed on the assigned group.

**Tracking Code:** TC-47203

**Issue:** When an administrator exports a design from one instance to another, the description value is not getting exported.

**Tracking Code:** TC-46413

**Issue:** In the left navigation panel, the expand/collapse state remains when a user logs in and out.

**Tracking Code:** TC-46409

**Issue:** When a user attempts to unsubscribe from a search view (when there is only one search view), a violation error message is displayed.

**Tracking Code:** TC-45589

**Issue:** All search views are automatically subscribed to a new user when they are created.

**Tracking Code:** TC-45490

**Issue:** While trying to add a Portal window title with Double Quotation(" "), undefined special characters are adding up.

**Tracking Code:** TC-49421

**Issue:** The results of a Custom Search with the Date field's operator-value set to the value "Older than 0 days" are not correct.

**Tracking Code:** TC-49671

**Issue:** Even if the order is specified in Setup, the columns added under Result Display of a new Search View (Custom Search type) are displayed alphabetically in the front end.

**Tracking Code:** TC-49566

**Issue:** Custom search option in the left navigation turned disabled in some scenarios.

**Tracking Code:** TC-49690

**Issue:** Table is getting distorted when performing drag and drop on the table in Interactive Grid.

**Tracking Code:** TC-49180

**Issue:** After selecting multiple operators in the filter criteria and selecting a number field multiple times, the login page is displayed to users.

**Tracking Code:** TC-49970

**Issue:** Outlook Add-in → If Integration Search View for an Entity is removed after that try to search the Matter name or number in that entity, then an Error message is not displayed in the user interface.

**Workaround:** If you observe that a search view is still appearing when it has been removed from integration, refresh the Add-in.

**Tracking Code:** TC-44471

**Issue:** TeamConnect tag is not visible for non-organizer users.

**Description:** When the attendee is not the organizer, "TeamConnect" tag is not visible on the appointment.

**Tracking Code:** TC-46785

**Issue:** Label only field mandatory icon is not displayed.

**Description:** While creating a matter, the mandatory or star icon is not displayed for the **Label** field.

**Tracking Code:** TC-48412

**Issue:** On the latest version of the document, the created on/old date is getting displayed on the respective document.

**Description:** Whenever a user views document version history, the current version has the original document's created date in the Add-in but every other version is having their original created date in the plugin.

**Tracking Code:** TC-47140

**Issue:** While creating All day Appointment in TeamConnect , the appointment is getting shift one day before in Outlook.

**Description:** While creating an all-day appointment in TeamConnect, the appointment will appear one day prior in Outlook. But in TeamConnect the updating date and time updates are accurate.

**Tracking Code:** TC-47870

**Issue:** Mismatched Appointment time is getting displayed in TeamConnect.

**Description:** When an appointment is created in TeamConnect, the time displayed is not matching with the created time.

**Tracking Code:** TC-47527

**Issue:** For the "Label Only" field if the user makes it as required in TC then a warning message is getting displayed and the user is not able to create the matter.

**Tracking Code:** TC-48265

**Issue:** Tabbing sequence on Firefox, after submit button not working properly.

**Description:** On Firefox, the task pane flickers after clicking the **Submit** button.

**Tracking Code:** TC-48267

**Issue:** (Error Logging) Attaching docs from Add-in to emails

**Description:** When the mailbox total capacity for attachments exceeds the maximum limit while attaching a document from Add-in to email, there will be an error but the error message will not be displayed in the Add-in.

**Workaround:** User must request for error logs to know the maximum size limit for the attachments.

**Tracking Code:** TC-42940

**Issue:** If the list field is mandatory and the user selects some default value, then it's not getting displayed as prefilled in Outlook.

**Tracking Code:** TC-48640

**Issue:** If "View Version" Permission has Denied to User Group, Still User can able to View the Version of the Document on Outlook.

**Tracking Code:** TC-48932

**Issue:** When "Create Matter all Categories" Permissions has been denied, Still User can add Categories to the Matter on TeamConnect and Outlook.

**Tracking Code:** TC-48880

**Issue:** When "Create Matter Assignees" Group Permissions has Denied ,Still User can add Assignees to the Matter on Outlook.

**Tracking Code:** TC-48879

**Issue:** If "View Matter All Custom Fields" Rights is Disabled for User Group, Still User can view the Matter Custom Objects on TeamConnect and Outlook.

**Tracking Code:** TC-48876

**Issue:** If User Denied Create Category rights to Document for User Group, Still User can add Category to the Document on Outlook.

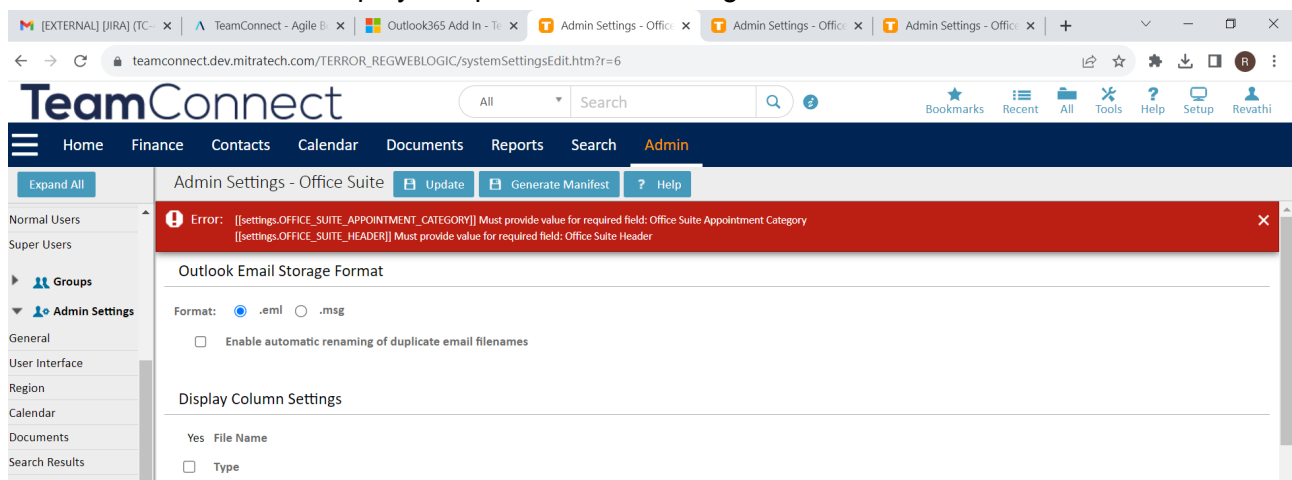

**Description:** Even when the Documents Permission for System rights is set to "Create all Categories" and the Category rights for "Add Category" are denied, users can still add categories in Outlook. While the above statement is true, this feature is working as expected in TeamConnect.

**Tracking Code:** TC-48938

**Issue:** If User made "Office Suite Header" and "Office Suite Appointment Category" fields Empty, the Default value is not getting Updated while Saving.

**Tracking Code:** TC-48891

**Description:** "Office Suite header cannot be greater than" is getting Displayed on the different Error messages instead of "Office Suite size limit". In case of a validation error on the Office Suite header field, it will display 2 separate error messages.

**Issue:** Unable to Upload a Document on Add-in with Safari Browser and MAC Desktop

**Description:** On Mac, the permission check for uploads occurs after the system attempts to

complete the upload, whereas on Windows, permissions are verified before initiating the upload process.

**Tracking Code:** TC-49212

**Issue:** Select Category using list

**Description:** The setting in TeamConnect designed to hide the tree structure for categories on the create matter screen does not function as intended. As a result, the tree structures for categories will always be displayed by default on the new matter creation screen.

**Tracking Code:** TC-47960

**Issue:** If a User creates a label and makes it mandatory, the user is not able to create a Matter.

**Tracking Code:** TC-49426

**Issue:** On Add-in Logs Settings, Unable to Update values on "Memory Storage Used by Logs" field.

**Description:** The provided value is not being reflected in the "Memory Storage used by Logs" field.

**Tracking Code:** TC-49303

**Issue:** In the Confirmation Pop-Up, the dropdown is not getting closed until the user selects any option.

**Tracking Code:** TC-49283

**Issue:** Add-in showing contacts even when a group or contact does not have rights to view.

**Tracking Code:** TC-49427

**Issue:** User Interface Issue: When multiple categories are chosen on the appointment page and the page is scrolled, the user interface becomes distorted.

**Tracking Code:** TC-49365

**Issue:** If the "Edit and Create Appointment Attendees" Permission is Disabled for the User Group, the User can still be able to edit and create the attendees for the Appointment.

**Tracking Code:** TC-48647

**Issue:** After removing Permission for the "Download Document", the user is able to see the download option and also able to download the document.

**Tracking Code:** TC-49429

**Issue:** After removing "Create all Categories" and "Add Category" Permission for User Group and User can still be able to Add Categories to the Documents.

**Tracking Code:** TC-49431

**Issue:** If a user does not have rights to view all custom fields from system and Category, the user is still able to view custom fields in Add-in.

**Tracking Code:** TC-49458

**Issue:** Certain Fields in Plugin Not Localized.

**Description:** The following fields in the plugin are not localized:

- None of the fields in the **Logs** are localized.
- Tabs which are used for Navigation are not localized.
- **"All Transactions"** Button is not localized.
- Search button from **Date Filter** is not localized.
- **"All Disputes"** button is not localized.

**Tracking Code:** TC-49419

**Issue:** Categories from appointments are not localized.

**Tracking Code:** TC-49459

**Issue:** Desktop Add-in → Unwanted document is downloaded in Teamconnect when clicking on "View in TeamConnect" option on the documents in Add-in.

**Tracking Code:** TC-44265

**Issue:** On Edit, Removing Additional Category doesn't change the Sync Status in Task pane.

**Tracking Code:** TC-49540

**Issue:** After Editing the Appointment & clicking on "save", not able to interact with the Add-in task pane in Appointments.

**Tracking Code:** TC-49541

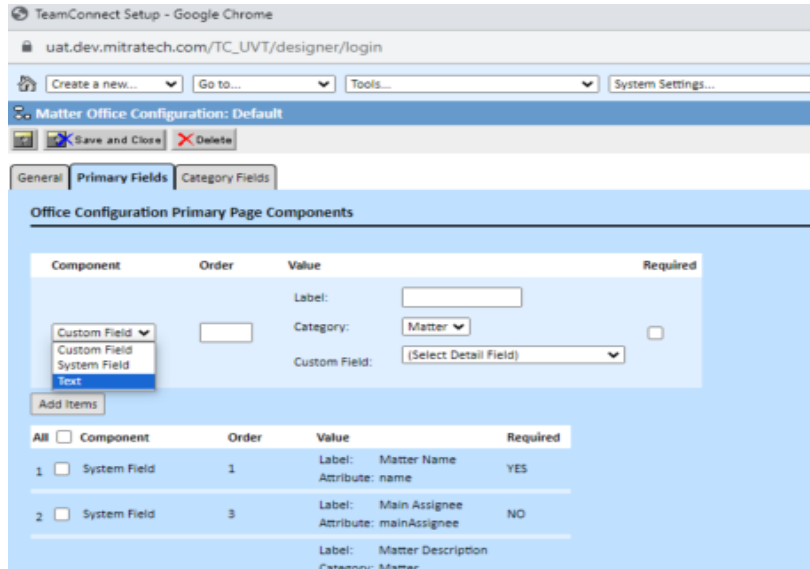

**Issue:** While running the schedule action after updating/deleting the appointment in TeamConnect, the user gets a new appointment in Outlook instead of updated appointment and for deleting the appointment it is not getting removed from Outlook.

**Tracking Code:** TC-49694

**Issue:** Support Text field in Component selection with Create Matter form.

**Description:** With the Add-in 4.0 release, the "Create Matter" form does not currently offer support for selecting a Text field under the Component selection. The plug-in supports this field.

**Tracking Code:** TC-49718

**Issue:** Unable to Upload Multiple Documents from Email.

**Tracking Code:** TC-49695

**Issue:** In Setup "Do not Display Category Tree" is Enabled , Invalid Category is getting Displayed on the user interface.

**Description:** If a user has enabled the "Do not Display Category Tree" checkbox in the Setup, the message "Category Selection Disabled" will be displayed under Categories.

**Tracking Code:** TC-49907

**Issue:** While searching matter using hyphen "-", in that case matter result is not getting displayed.

**Tracking Code:** TC-49927

**Issue:** Force Sync Feature sends two meeting invites to non Add-in users.

**Tracking Code:** TC-49536

**Issue:** Retry queue is generating thousands of retry items.

**Tracking Code:** TC-49450

**Issue:** Alignment of the Searched Results are not proper Under Documents Tab.

**Description:** The alignment of the result list on the Documents tab is not proper.

**Tracking Code:** TC-49931

**Issue:** Date Filter Calendar Not using User Preferences Localization.

**Description:** The Date Filter calendar in the Office Add-in is utilizing the Admin Preferences Region setting instead of the User Preferences Locale to determine the language for displayed text.

**Tracking Code:** TC-49933

**Issue:** Add-in is not Opening on Safari Browser.

**Workaround:** We suggest you try utilizing an alternative web browser on your Mac.

**Tracking Code:** TC-49952

**Issue:** User not able to create a matter if the custom Field is deleted from the Setup menu.

**Tracking Code:** TC-49430

**Issue:** For non-indexed objects, performing the Global Search displays an error message.

**Tracking Code:** TC-49330
