Changes in this Release

IntergrumNow Features & Enhancements

Mobile

S. No	ID	Description	Fix Version
1	INTSUP-154	New enhancement providing the option for users to input the number range from 1-200 in the text/number fields.	v2.3

Error Corrections

S. No	ID	Description	Fix Version
1	INTSUP-1	Resolves issue with the user unable to login IntergrumNow application. The user gets stuck at the login page after clicking login button.	v2.3
2	INTSUP-43	Resolves the issue where the application has to be changed to light mode from dark mode to view the details entered in the text field. This has now been fixed. The user is now able to view the details entered in the text field while the application is in dark mode.	v2.3
3	INTSUP-52	Resolves an issue where the mobile application is unable to populate 'Services Provided' dropdown based on Parent Company dropdown.	v2.3
4	INTSUP-102	Resolves an issue where the user is unable to sync the drafts from android application to web.	v2.3
5	INTSUP-125	Resolves the issue of submitted forms which are not being synched to web and the user also gets locked out from the web application.	v2.3
6	INTSUP-134	Resolves the issue with the smart form where the user needs to fill the details again from the beginning as the application takes the user back to home screen after closing the form.	v2.3
7	INTSUP-140	Resolves an issue of color contrast in the Synched Forms page. The user is unable to distinguish the details on the page as the color contract is unclear.	v2.3
8	INTSUP-146/ INTSUP-147	Resolves an issue where OU values are not being prepopulated in the iOS and android application.	v2.3
9	INTSUP-148	Resolves issue with the prepopulated texts on hidden fields in forms which are not visible.	v2.3
10	INTSUP-158	Resolves an issue where a user is unable to find a risk matrix value when the risk matrix is re-edited after clicking submit/submit as draft button and synching it to the web.	v2.3
11	INTSUP-159	Resolves an issue where a form reference number should be five characters instead of four when it is created from the mobile application.	v2.3
12	INTSUP-161	Resolves an issue where the user is unable to login using the Non-SSO login after performing the SSO login and signing out as the login page freezes. This has now been fixed.	v2.3

13	INTSUP-177	Resolves an issue where number three appears in the text of all question radio buttons.	v2.3
14	INTSUP-184	Resolves an issue in Android application where the background color is black instead of white.	v2.3
15	INTEGRUM-183	Resolves an issue where the lookup auto-population fields in both iOS and Android are not being displayed.	v2.3
16	INTEGRUM-198	Resolves an issue where My AMS displays new forms instead of prefilled forms.	v2.3
