integrum Release Notes – Template Version 9.14

Item No.	Area	Type	Job Title	Description
1.	SMARTForm	Enhancement	MicroDB Sort Function	<p>An enhancement has been done to the MicroDB Section on SMARTForms.</p> <p>A Superuser will enable the MicroDB Sort function. This function will add a header line above the MicroDB fields which will allow for sorting of the data within the columns by descending or ascending order. In addition, a SuperUser can set a Column of the MicroDB to be sorted in descending or ascending order by default. Please see annexure below for further instructions.</p>
2.	SMARTForm	Bug	Employee lookup fields in Smart Form not changing to first name	<p>There was an enhancement to the default search types within the employee lookup field in SMARTForms to increase the default search value options. Options available now include: First Name or Last Name or Email address</p>
3.	SMARTForm	Bug	Risk Matrix fields not displaying in MicroDB Summary section in forms	<p>A bug was identified where the Risk Matrix SMARTForm field was used in a MicroDB table. Whilst a selection was made within the Risk Matrix field, it wasn't being displayed in the MicroDB table after saving.</p> <p>This bug has now been resolved. The value from the Risk Matrix field is now displaying in the MicroDB table.</p>
4.	SMARTForm	Enhancement	Allow User Raise Sub Form on Completed	<p>An enhancement was done to allow a general user to create a subform when the parent SMARTForm status is Completed.</p>
5.	SMARTForm	Enhancement	Cancel the copy process and not create the SF copies	<p>An enhancement was done to the SMARTForm Copy function to allow the user to cancel the creation of the copy at any stage within the copy process.</p>
6.	SMARTForm	Enhancement	Reference Number of SMARTForm – increase maximum number component	<p>An enhancement was done to add an additional number to the SMARTForm reference number to allow for 10 000+ SMARTForms to be created in a single month.</p>
7.	integrum Administration	Enhancement	Add additional field to the export functionality	<p>An enhancement was done to the Export to Excel feature so when data is exported from the Employee database, the export will include the Employee ID, Job title & Job Position.</p>
8.	SMARTForm	Enhancement	MR2 Reject to MR1 Review workflow	<p>An enhancement was done to the Review Workflow function to allow the second MR to have the ability to reject a SMARTForm to the first MR.</p>
9.	SMARTForm	Bug	GSR OU is not inherited properly to subforms from parent document	<p>A bug was identified whilst using GSR OU Structure where the OU Structure was not inheriting between Parent and Subform/s.</p> <p>This bug has now been resolved. The OU Structure is now inheriting between Parent and Subform/s.</p>

integrum Release Notes – Template Version 9.14

10.	SMARTForm	Bug	Please fix the issue on intelliHUB with creating and viewing OU's under the OU2 filter	<p>A bug was identified when using Standard OU Structure where a user could create a new OU in the Organisation Structure list but could not view the information about the newly created OU as the user received a “no access” error.</p> <p>This bug has now been resolved. A user can now access and view the contents of the newly created OU.</p>
11.	SMARTForm	Bug	Date field expansion to dates prior to 1959	<p>A bug was identified that restricted users from selecting a date prior to 1959.</p> <p>This bug has now been resolved. The date field will allow a user to select dates prior to 1959.</p>
12.	SMARTForm	Enhancement	Attachment field rebuild	An enhancement has been done to the SMARTForm Attachment field to reduce processing time when uploading files.
13.	SMARTForm	Enhancement	Email Link Options Remembers Assignee and Text	An enhancement has been done to clear the values from the Email Link SMARTForm function.
14.	Asset Management	Bug	New Asset Fields	<p>An enhancement was done to Assets to add fields to capture:</p> <ul style="list-style-type: none"> • General information • Vehicle Details • Registration • Fleet Image • Maintenance • Odometer Reading • Finance Details • Vehicle Disposal/Sale
15.	SMARTForm	Bug	Free Text Search does not work if the whole word is not entered	<p>A bug was identified when searching in the view where searching using the free text field only returned a result if the whole word was typed.</p> <p>This bug has now been resolved to allow free text searches on full and partial wording.</p>
16.	SMARTForm	Bug	Issue raising incident forms	<p>A bug was identified where on raising a new SMARTForm the system was directing users to an “Unexpected Runtime Error” page.</p> <p>This bug has now been resolved.</p>

integrum Release Notes – Template Version 9.14
