Client Release Notes
Template Version 9.17

integrum

Item No.	Function	Category	Description
1	SMARTForm	Enhancement	New enhancement providing the option for Initiators to raise Sub Forms when the Parent form is in a Closed status
2	SMARTForm	Enhancement	New enhancement allowing softcoded status values to reflect in View Registers, including the Status filter within the View.
3	SMARTForm	Enhancement	New enhancement whereby the Save & Continue button will activate the MicroDB section. Adding this button to the SMARTForm activates the MicroDB section with one click instead of the usual 2 click (Save / Edit) step.
4	Document	Enhancement	New enhancement to allow multiple Reviewers to reject a document and, capture the comments recorded by each Reviewer.
5	Document	Enhancement	New enhancement introducing the option to continue the review process post one reviewer rejecting the document.
6	SMARTForm	Enhancement	New enhancement introducing a configuration option to change the hardcoded Action form Header to reflect the Action Title. To reflect behaviour in earlier template versions, this setting is enabled by default.
7	Document	Enhancement	New enhancement making the *New Document* button available in the Approved Controlled Document View.
8	SMARTForm	Bug	Resolves the issue where the Sort order applied to the Date field was not carrying across subsequent pages within the View Register
9	Document	Bug	Resolves the issue where the Document initiator and author were unable to raise a SMARTForm from within the Document
10	SMARTForm	Bug	Resolves the issue with the date / time recording in the Audit trail (UK clients)
11	SMARTForm	Bug	Resolves the issue of Associated Documents not displaying post Save or Submit.
12	SMARTForm	Bug	Resolves the issue with hidden OU values when the OU fields are prepopulated
13	SMARTForm	Bug	Resolves an issue where subfields do not clear when the value in the parent field is changed.
14	SMARTForm	Bug	Resolves an issue where predefined text was not displaying when the field in which it was set to display was a subfield of a parent field.
15	Meeting	Bug	Resolves an issue where a Reference Number was not being auto applied to created Meeting Records.
16	SMARTForm	Bug	Resolves the issue where a 'Processing error' was being encountered when using the Complete & Schedule function.
17	SMARTForm	Bug	Resolves an issue where the name of the second Form MR was not reflecting in the View Register when they were the assignee on the SMARTForm
18	Employee	Bug	Resolves an issue where users flagged as Alumni were incorrectly appearing in the Document Approver selection list.
19	CAR	Bug	Resolves an issue in the CAR Module where deleted IIR records were continuing to show in the View.
20	SMARTForm	Bug	Resolves a bug where data entered a MicroDB section wasn't visible.
21	SMARTForm	Bug	Resolves an issue where hardcoded Action forms were still visible within the SMARTForm View Register post deletion.
22	Employee	Bug	Resolves an issue where email notifications were not being received when exporting a list of employees via the Export All CSV or Excel buttons
23	SMARTForm	Bug	Resolves an issue where the option to close (denoted by the X symbol) was aligning incorrectly
24	SMARTForm	Bug	Resolves an issue with where Views were not prefiltering correctly when the prefilter was set to OU1
