Changes in this Release

Integrum Features & Enhancements

S. No	ID	Description
1	INTEGRUM-57	Enhanced the functionality of the Contractor creation to match the functionality of employee creation in the Integrum app.
2	INTEGRUM-66	Implemented functionality to export multiple smartforms in the View Register page to PDF at once by selecting the PDF Mass Export button. The user must select the smartforms that need to be exported and select the PDF Mass Export button to export.
3	INTEGRUM-106	Implemented Smartform Retention Policy for the documents in the Integrum application.
4	INTEGRUM-176	Implemented a new functionality to edit the subform of a parent form Initiator/FormMR. To enable the edit access by the Initiator/FormMR, the user must select the radio button 'Yes' for the setting "Enable Sub-form edit access for Initiator / MR".
5	INTEGRUM-200	Implemented a character limit functionality for the 'Field Type' text field in the field library. The character limit can be set in the setting 'Please enter a character limit'.
6	INTEGRUM-215	In the Integrum Web view settings, when the user selects View Style as 'Flat (X-Pages Style)', the View Org Category filter isn't filtering the correct OU level.
7	INTEGRUM-278	Implemented a 'Search By' option in the Employee Select Field to let the users search for contractors by typing in the contractor company name.
8	INTEGRUM-348	Improved the Form MR1 and MR2 visibility in the subforms in a 2-step approval workflow. The MR1 and MR2 fields will be now displayed in the subforms via configuring the fields from the workflow wizard settings.
9	INTEGRUM-362	Implemented Smartform import tool for importing smartform into the application and the user can only import CSV files.
10	INTEGRUM-391	Introduced and implemented a new option 'Dynamic Workflow' as a part of the Form Workflow Type setting in the Workflow Wizard in the Integrum application. Users can now select the Dynamic Workflow option from the dropdown and customize the workflow steps.
11	INTEGRUM-457	Implemented functionality to send before and after the Due Date of Training notifications to the users assigned with training. The notification can also be sent to other Users; Managers/Supervisors, Roles and Groups.
12	INTEGRUM-472	Implemented Smartform import tool for importing smartform into the application.
13	INTEGRUM-485	Enhanced free text search functionality in Views. <ul style="list-style-type: none"> When the user uses random search words, the app should display documents when matched with the random search word, otherwise, the app displays a 'No Documents Found!' message. When the user uses the exact wording for searching the documents, the app displays the exact matching word documents in the result grid.
14	INTEGRUM-568	When the Integrum user changes the employee profile in the employee module, the changes made are now captured in the audit trail.
15	INTEGRUM-664	Enhanced the assigning training courses to the users. Earlier, to assign multiple courses, the user must individually select each course. With the new enhancement, the user can select all courses by enabling the 'Check all' button to select all courses at once.

16	INTEGRUM-1033/ INTEGRUM-1232	Implemented Smartform import tool. The users can now import smartform into the application.
17	INTEGRUM-1090	Implemented a new radio button option 'Predefined Reference Number' to enable the app to import a smartform having a predefined document reference number.
18	INTEGRUM-1117	Enhanced the Smartform retention policy in the Integrum application. Enhancements were implemented to Smartform records like field values, additional parameters, workflow status and subform management.
19	INTEGRUM-1174	Improved the alignment of the company logo and privacy statement in the form PDF report.
20	INTEGRUM-1306	Implemented a feature where upon clicking on the back button on the homepage should display a message 'press back again to exit App?'. On clicking on the back button again, the user exits the application.
21	INTEGRUM-1432	Implemented a functionality in the application where the document columns like Non-Conformance/Issue, Details of Corrective Action Taken, and Root Cause Analysis, in the view register page, should be displayed in ascending order including the case sensitivity. Note: Click on the columns 'Details of Non-Conformance/Issue', 'Details of Corrective Action Taken', and 'Root Cause Analysis', then the system should filter the created docs with ascending orders including case sensitivity.
22	INTEGRUM-1443	Improved the submit smartform message from 'Thank You for your Submission. Please click here to close the browser window ' to Thank You for your Submission. Please click here to close the browser page ' since the only tab will be closed in the browser.
23	INTEGRUM-1526	Implemented real-time export functionality for MicroDB. The Integrum users can now export MicroDB.
24	INTEGRUM-1887	Implemented new fields 'Enable Multi-Tenancy', 'Client Org Name' and 'Client Org Id' in the Business Reporting.
25	INTEGRUM-1902	Implemented a new functionality to auto-generate subforms. The Integrum user must choose a 'sub-form templates' from the dropdown for the setting 'Auto-generate templates' setting within the workflow wizard of the main form template and then select 'Yes' for the setting 'Enable Auto-generate for various OU structure', 'Open' for setting 'Initial Status'.
26	INTEGRUM-1971	Implemented real-time export functionality for the Operational Control module.
27	INTEGRUM-2049	Enhanced the functionality of showing relevant templates and view types in the view register. When the user selects 'Yes' for the setting 'Display View Title', the form should display the view name based on the configuration.
28	INTEGRUM-3235	Enhanced the Single Stage Review Workflow. With the new improvement: <ul style="list-style-type: none"> • The MR can reject a form in Open status and the Initiator can reject it in Review status. • After rejection each actor (MR/Initiator) will be able to Edit and either re-submit or resend. • Each actor receives the respective rejection emails.
29	INTEGRUM-4434	Introduced a new button option 'Clear' in the Integrum app, enabling the user to remove the selected date from a date field and leave it blank if needed.
30	INTEGRUM-4814	Enhanced the lookup table performance in the Integrum application.
31	INTEGRUM-4970	Introduced hover help icon to help the user if any additional information is required to understand a field in a Smartform. The user can enable or disable the display of the hover help icon from the settings.

32	INTEGRUM-5087	Implemented a Smartform import functionality in the View template. The user can import a Smartform in View Template using the 'Import SMARTForm' button in Views.
33	INTEGRUM-5100	Implemented a new functionality to set the default MR Roles for each of the stages (where applicable) of Dynamic Workflow based on Smartforms OU4 levels. This functionality is achieved when the setting 'Select Form Mgt Rep from' is set to 'Role-based OU' in the workflow wizard.
34	INTEGRUM-5478	Implemented drag-and-drop functionality for the attachments.
35	INTEGRUM-5867	Enhanced the scheduling functionality where the 'Complete & Schedule' button is now shown only in the "In Review" status of a form when the Initiator review workflow is used. Earlier, the 'Complete & Schedule' button is now shown only in the "Open" status of a form.
36	INTEGRUM-6338	Enhanced the UI by increasing space between the form Initiator's name and the employee select box.
37	INTSUP-46	Enhanced the functionality to press enter to add text in multiple lines in a text field in a smartform. Earlier, the user could not add multiple text lines in a text field.
38	INTSUP-131	This is an enhancement where the blank portal from the employees' profiles has been removed.
39	INTSUP-179	Enhanced the export to word functionality by disabling the hyperlink in text area field types in a document. Earlier, when a document is exported to Word, the hyperlink data in the text fields is shown incorrectly.
40	INTSUP-188	Enhanced the Email notification functionality when a form is rejected by Form MR. With this enhancement, the initiator (auditor) of the form now receives an Email notification when a form is rejected.
41	INTSUP-216	Implemented additional timezone information to be displayed in the export log email. Earlier, only time and date information was included in the export log email.
42	INTSUP-302	Removed the password prompt message when a user manually creates a new user in the app.
43	INTSUP-318	Enhanced the functionality of selecting a 'Co-Editor' in the smartform. Earlier, the user could only select the 'co-editor' field when the form was in draft state. Now, the user can select the field 'Select the co-editor' by selecting multiple form status options available in the setting 'Enable Multiple-editors for WF status'.
44	INTSUP-319	Introduced a new 'GPS Location' field in the Smartforms to select the location of an incident or site. The app displays the 'Location not available' option in the field when the location is unavailable.
45	INTSUP-329	Enhanced the OU view filter in the Integrum app by removing the blank filter option.
46	INTSUP-543	Implemented a new functionality in the application where the user can select the 're-assign' button in the forms that are in rejected status. You must select 'Yes' for the setting 'Enable Re-assign in reject status' to enable this functionality.
47	INTSUP-1619	Introduced a new option "Enable audit trail section in PDF format:" in Template in the Workflow Wizard settings. When the user selects the 'Yes' radio button the system displays the audit trail in PDF format.
48	INTSUP-2653	The application creates multiple save/conflict acknowledgements for the same document when edited by two users simultaneously. This issue is resolved by introducing a lock feature that locks the document from being edited by the 2nd user when the same document is edited by two users simultaneously.

49	INTSUP-5246	Integrum users can now create big tables with more than 200 fields using RTA which helps in importing forms with more than 200 fields.
----	-------------	--

Integrum Error Corrections

S. No	ID	Description
1	INTEGRUM-4	When the Integrum app user raises a form, saves it and re-edits the form, the OU structure gets disappear.
2	INTEGRUM-11	The Integrum app user is unable to open a pre-defined URL word document in a Chrome browser.
3	INTEGRUM-31	When the Integrum users add a MicroDB section in a form, the app takes too long to load.
4	INTEGRUM-32	When an Integrum user raises a subform and selects the OU values, the corresponding OU values are incorrectly populating.
5	INTEGRUM-49	When the Integrum user re-assigns a form, the app asks for mandatory fields to be entered before re-assigning, instead, the user can re-assign a form without entering mandatory fields.
6	INTEGRUM-50	In the Integrum app, when the user tries to download a document using the button 'Please download right now' (configured as a pre-defined URL) via a Chrome browser, the document does not get downloaded.
7	INTEGRUM-132/ INTSUP-139	When a course is assigned to a user and the user tries to close the course after completion, the app displays an error "HTTP Web Server: Couldn't find design note - fa_CourseBalance".
8	INTEGRUM-138	The configured restricted view for the forms is not working if all the OU fields are not present in the form.
9	INTEGRUM-238	In the Integrum app, when a parent field is selected the associated sub-fields are populated according to the workflow, but when the same parent field is changed, the associated sub-fields should be hidden. Instead, the sub-fields are being displayed.
10	INTEGRUM-242	When a new form is raised in the application and an unauthenticated user is selected as the initiator of the form, the user is unable to select the OU level.
11	INTEGRUM-260	In the View Library, when the Integrum user tries to filter the smartform views using the filter option, the app does not allow all configured fields to be filtered.
12	INTEGRUM-266	The Integrum users are unable to login to the application using the Single Sign-On (SSO) option.
13	INTEGRUM-299	When the Integrum user tries to view the Document Controls data views, the app displays a syntax error.
14	INTEGRUM-311	In the Document Control module, the timestamp is incorrectly captured in the audit trail and workflow log.
15	INTEGRUM-317	When the document change request email notification is triggered, the email body does not display the comments and details of the person involved.
16	INTEGRUM-328	When the Integrum user opens a field-level action or a subform under a parent form, the app displays an 'Unexpected Runtime Error'.
17	INTEGRUM-337	When the Integrum user attaches a file, the user can describe the attached file in the 'File Description' field. But the 'File Description' field name is changed to 'Comments' when the file is uploaded.
18	INTEGRUM-368	The Integrum user is unable to use the filter option in the Document Management when entered via the Implementation/Operational control module as the OU filter keeps loading without getting displayed.
19	INTEGRUM-381	The XPages that are set up for authorized documents in the Document Control are displaying draft and review documents along with the authorised versions. Instead, only authorized documents should be displayed.

20	INTEGRUM-383	The upload button in the main contents section of the Operational Control in the Implementation and Operation module is not visible even after an image is inserted.
21	INTEGRUM-392	Despite the delete button being configured in the application, Integrum users are unable to find the delete button for any of the records in the app.
22	INTEGRUM-396	When the Integrum user uses the 'Update Assignee' functionality to re-assign ownership of the form, the audit trail does not capture the change log.
23	INTEGRUM-397	The Integrum user is unable to find the document in the user's My Outstanding Procedures view despite the document being assigned for review.
24	INTEGRUM-412	When the Integrum user uses export to word functionality, the app displays an 'Error: check console' message.
25	INTEGRUM-415	The Form MR is unable to edit the imported Smartforms.
26	INTEGRUM-426	When the Integrum user uses version control or review functionality in the form, the audit logs record time in BST (GMT+1) instead of GMT.
27	INTEGRUM-434/ INTEGRUM-581	When a dual email notification is enabled, the 'Label for Company Server' field value is not updated in the email notification.
28	INTEGRUM-438	The version history dialog box does not align properly when the large text is entered.
29	INTEGRUM-440	The version history status on a Smartform does not match the record status.
30	INTEGRUM-443	When the Integrum user makes changes in the smartform, the change logs are not captured by the audit trail.
31	INTEGRUM-475	When the Integrum user rejects a form and makes a comment for the rejection, the comment is not updated and the app notification does not display any comments made.
32	INTEGRUM-484	When the Integrum user uses the flat view style for views, the filter functionalities setup does not work with this style of view when filtering on the OU4 level.
33	INTEGRUM-567	When the Integrum user uses the Google Translation configuration option to change the form content to a different language and submits the form, the form content is submitted in a different language.
34	INTEGRUM-661	The Integrum users do not receive notifications via email when a job position and courses are assigned.
35	INTEGRUM-663	When the Integrum user schedules multiple courses for new employees without entering the date, the app must display a pop-up message to enter a date. Instead, the user can save the schedule even without entering the date.
36	INTEGRUM-867	In the Integrum app, the re-open button is working as expected in the 2-step approval workflow. When the reopen button is used to open a completed form, the MR name is not changed to MR1 but still reflects MR2's name.
37	INTEGRUM-881	In the Integrum app, the section inheritance function does not work between parent and subforms.
38	INTEGRUM-931	When the Integrum user makes changes in a Smartform, the app captures the HTML code changes in the audit trail, instead, the app should record the value changes only in the audit trail.
39	INTEGRUM-999	In the Integrum app, the sorting of documents in the system documentation is not done correctly.
40	INTEGRUM-1018	When the Integrum user exports a checklist PDF, the exported document contains the wrong logo.
41	INTEGRUM-1046	In the Integrum app, despite the 'Does document needs to be reviewed' option being set to 'No' the Review Due Date is populated. Instead, the review due date should be blank.

42	INTEGRUM-1089	In the Integrum app, even though the disclaimer is set, the 'Print with Disclaimer' button is not working. The disclaimer is not getting displayed in the print.
43	INTEGRUM-1091	In the Integrum application, the Document control data view filter displays OU2 separately from the OU hierarchy.
44	INTEGRUM-1839	In the Integrum app, the Document Control Revision Notification Group dropdown is working as a free text search field.
45	INTEGRUM-1924	In the Integrum app, when the XML generation output is enabled, the Number field responses are incorrectly populated in XML with the value 0.
46	INTEGRUM-1973/ INTEGRUM-2401	In the Integrum application, the duplicate records are displayed in the Document control data view.
47	INTEGRUM-2204	The Integrum user is unable to progress with the dynamic workflow for the mandatory subform. The workflow gets stopped even when the subform is created.
48	INTEGRUM-2228	The user is unable to create OU6 for the Group Reporting structure. The app restricts the user to creating a Group Reporting structure until OU5 only.
49	INTEGRUM-2592	Instead of allowing, selecting 'Yes' for the setting "Enable Group Edit Rights by ACL" does not allow the user to create a subform.
50	INTEGRUM-3213	A management-approved document does not display the attached document, instead, the attached document should be displayed.
51	INTEGRUM-3223	The Integrum user is unable to add a MicroDB section in a form. When the user enters the mandatory fields and selects Save, the app displays a pop-up with a message asking the user to fill out the mandatory field.
52	INTEGRUM-3228	SmartForm select category from library Issue: <ul style="list-style-type: none"> In the form template when a section is added from a section library category, and then a subsequent category is selected, and when the user returns to the previous category, the section is available to add to the form again, instead the section should not display or be available to re-select if already added to the form. In a form section after a field is added from a field library category and then a subsequent category is selected, the user returns to the previous category, and the field is available to add to the section again. Instead, the field should not display or be available to re-select if already added to the section. In a form section the fields are categorized but appear as Not Categorized in the Select Field Category. Instead, a categorized field should not display or be available to re-select from the Not Categorized, category.
53	INTEGRUM-3242	When the Integrum user exports views from the View Register, the exported file contains additional confidential forms which are not visible in the view.
54	INTEGRUM-3245	The Integrum application's browser tab name is missing. If the user is on the view register page, the tab name should be the view register title.
55	INTEGRUM-3260	The Integrum application is unable to send a .pdf file as an attachment in a notification sent to others provided the "Enable Others to Notify Notification" setting is enabled.
56	INTEGRUM-3262	The Integrum application displays a runtime error while creating a new password for a new user.
57	INTEGRUM-3263	When a user has an OU value separated by a comma, raises a form, and saves it, the form should be saved in the records in a draft status instead the form is missing due to a comma in the OU value.

58	INTEGRUM-3270	When a user tries to drag a MicroDB window to position it, the window moves to the bottom of the screen and is not visible unless the user scrolls to the bottom of the page.
59	INTEGRUM-3325	In a Smartform, when a user selects a radio button, the subsequent radio button fields are displayed, but when the user decides to change the initial selection, the subfields should be hidden, instead, they remain visible.
60	INTEGRUM-3343	When the confidentiality setting is set to 'Yes' and the default to 'Private' in a 2-stage workflow, the setting does not allow MR1 for employee selection in the second stage.
61	INTEGRUM-3364	In the View Register, when a newly added column is soft-coded (updated/edited), the column is not displayed. Instead, the added column should display in the view with or without soft coding applied.
62	INTEGRUM-3366	While setting up the field-level notification, both the Section and Field ID get dropped and an error occurs when they are manually entered and the notification is not sent. With the new enhancement, the user can now right-click to select both Section and Field IDs to reduce the error.
63	INTEGRUM-4241	Enabling the form editing rights by ACL i.e. selecting 'Yes' for the setting "Enable Group Edit Rights by ACL" incorrectly allows the editing of the completed records.
64	INTEGRUM-4331	The Integrum user is unable to add look-up table columns in the forms.
65	INTEGRUM-4486	Document Management Issue: <ul style="list-style-type: none"> • When the Integrum user sets up the View Org category, the documents do not get displayed accordingly. • The revised document notification after document authorization is not working.
66	INTEGRUM-4659	When a subform is inherited with a few details from the parent form, instead of restricting the user, the mobile app allows the user to edit the inherited details.
67	INTEGRUM-4945	Despite the delete button being configured in the smartform, it is not being displayed.
68	INTEGRUM-5048	When a user extracts a PDF of a form with the MicroDB section, the PDF does not display the MicroDB column data but only the section name and section information is displayed.
69	INTEGRUM-5225	In a Smartform, when a user adds the MicroDB data and saves it, the MicroDB data record is not displayed.
70	INTEGRUM-5396	In the Integrum web application, the mandatory Asterisk symbol does not display next to the field label in the MicroDB section.
71	INTEGRUM-5442	When an Integrum user re-assigns a Smartform to a new user, the re-assign employee 'Search By' filter does not default to the first name as per the system settings.
72	INTEGRUM-5460	When a user adds multiple editors in the Editor field in a Smartform, the time in the audit trail is captured in BST format (1 hour ahead of the current timezone) instead of in GMT format.
73	INTEGRUM-5563	The superusers of the Integrum app are unable to delete a record as the delete button is not displayed despite the configuration.
74	INTEGRUM-5612	In the Integrum app, blank email notifications are sent to the users when the record is in Open status.
75	INTEGRUM-5613	In a Smartform, the user is unable to remove an added name in the 'Additional Editors' field.
76	INTEGRUM-5616	When a Smartform with a hover help is exported as a PDF, the hover help information in the PDF is displayed as a code.

77	INTEGRUM-5857	When the user clicks on the calculate button in the MicroDB section of a Smartform, the hover help icon and the mandatory asterisk disappear.
78	INTEGRUM-6004	The ACL group is able to edit the subform but it is unable to create subforms and associated records, instead, the ACL group should be able to create subforms and associated records.
79	INTEGRUM-6005	The questionnaire field in the subform inherits the value from the parent form correctly but does not open the section. The user has to manually deselect the value and reselect to open the section.
80	INTEGRUM-6345	UI/UX Fixes: <ul style="list-style-type: none"> When a blue [vertical] theme is selected, the app uses a different field label color than the standard Blue theme. The color is now changed from blue [vertical] font to black. Adjusting screen size breaks the section columns in the new blue [vertical] theme. When users zoom in and out the columns don't stay consistent.
81	INTEGRUM-6593	UI/UX issue: In an Integrum Smartform the section info dropdown does not align with the fields and the dropdown arrow is not placed correctly.
82	INTSUP-15	When an Integrum user tries to amend changes in the training record and selects Save, the app displays an error message.
83	INTSUP-23	The fonts in the Vietnamese language in the CAR comment section by the Form MR are not displayed correctly.
84	INTSUP-26	The records under the Quicklinks section in a form are displayed multiple times.
85	INTSUP-45	When an Integrum user searches for another user from the "Import from address book" window, there is a delay in retrieving the data and sometimes displays an error "There has been an error displaying the data".
86	INTSUP-61	When the Integrum user filters "Second Filter MR List:" by or without OU values in the workflow wizard, the filter does not work accordingly. When the MR2 list is retrieved, the list of MR1 is displayed.
87	INTSUP-62	The form workflow email notification does not work as expected. Instead of displaying numeric characters in the frequency field, the app should only display alphabet characters.
88	INTSUP-64	The comment section in the CAR request does not support all languages. Instead, it should support all languages and should be reflected in the audit trail.
89	INTSUP-67	The Integrum users are unable to view the Course ID code in the training view.
90	INTSUP-68	The Integrum user is unable to delete training records.
91	INTSUP-70	When an Integrum user uses hover help for a field in a form, the hover help content is squashed on the wrong side of the field.
92	INTSUP-71	The Integrum user is unable to save/submit a form after uploading the newly uploaded file in the lookup table of a form template.
93	INTSUP-72	The Integrum user is unable to archive a training course, as the archived training course is not being displayed in the archived views.
94	INTSUP-82	In the Integrum app, the user is unable to find the completed actions in the Calendar.
95	INTSUP-90	The Integrum user is unable to move the training courses from view to the archived training course section once archived.
96	INTSUP-100	When an overdue notification for a form is triggered and sent to the users, the notification mail is sent with an empty Entity name.

97	INTSUP-127	When an Integrum user works on a form in Edit mode, the form name is not displayed.
98	INTSUP-144	When an Integrum user opens an app portal page, the page tab name is displayed as the page design name. Instead, the portal page tab name should be the portal page name.
99	INTSUP-186	When an Integrum user selects a few fields to be enabled as filter options the added filter options do not work and result in a blank views screen with no records.
100	INTSUP-196	When an Integrum user selects Export to Excel from Views, the Overdue date in the Excel is displayed incorrectly but the overdue date value is shown correctly in Views.
101	INTSUP-197	When an Integrum user selects Export to Excel from Views, the generated Excel report shows incorrect data in the Excel columns.
102	INTSUP-200	When an Integrum user enters a text value with the double quotes ("") in a text field in a Smartform and selects save/submit, the app does not retain the entered text field values.
103	INTSUP-206	When an Integrum user tries to generate a PDF report for a form, the app displays an error message 'Agent done'.
104	INTSUP-224	When an Integrum user applies form field translations from English to Portuguese in both View Template and Document View, a few of the form fields remain in English.
104	INTSUP-229	When a user selects the 'Export All' button for the employee report 'By ACL Group', the report is not generated or sent via email.
106	INTSUP-231	The app users are unable to add subforms to the parent form which is in rejected status.
107	INTSUP-251	In the Integrum app, the overdue notifications are getting triggered for the forms which are in 'In Review' and Draft status.
108	INTSUP-260	When the user tries to filter out the records based on the free text search option in operational control, the app displays a syntax error.
109	INTSUP-264	When the user adds new MicroDB fields to an already existing form, the existing records do not get updated and newly added fields are not displayed.
110	INTSUP-267	When a user opens a form, the form takes more than 3 minutes to load and display data, instead, the form should be loaded within 40 seconds.
111	INTSUP-268	The QR code functionality is not working as expected. The QR code generator is missing from the template wizard.
112	INTSUP-283	When a user raises a form and selects a radio button in the form, the app does not display any sub-field values.
113	INTSUP-312	The app does not display the headline sub-field when the user selects the 'No' radio button option for the setting 'Risk Reduced to "SFARP'. Instead, the headline sub-field should be displayed.
114	INTSUP-320	The MR2 value appears twice in the MR2 field when a user submits a form to MR2.
115	INTSUP-328	Despite the setting 'Collapse all section when opened by questionnaire' is set to 'No', the questionnaire Field section is displayed in a collapsed mode.
116	INTSUP-332	The mobile app does not display the correct number of total records (all) when compared to the web views.
117	INTSUP-340	The app does not display the 'Submitted On' system field added in a report in Views.
118	INTSUP-354	When the user uses the "Create PDF" option, the Image in the PDF is not displaying correctly.

119	INTSUP-355	When an OU structure is updated in a smartform, the auto-populated data in the smartform gets deleted.
120	INTSUP-368	The app displays an incorrect sub-form reference number as the sub-form does not inherit the reference number of digits from the parent form.
121	INTSUP-374	The middle name of the employee is getting removed from the app even after updating the name.
122	INTSUP-407	When the GSR restriction is enabled in the app, the user is unable to view the documents in his GSR values.
123	INTSUP-435	When a user selects a view, the results should be displayed according to the OU restrictions but the app displays restricted records as well.
124	INTSUP-450	When a user selects the 'Calculate and Continue' button in a smartform, the page gets refreshed to display the results but the user lands at the bottom of the page upon refresh. The user has to scroll up to view the results.
125	INTSUP-527	The app does not display a login error message when a user fails to log in due to an incorrect username and password.
126	INTSUP-528	When a new employee role is being created, the app does not pass the default selection of the 'BI Reporting Role' option and the user has to manually reselect the option to register the role.
127	INTSUP-535	The users are able to submit a smartform without mandatory fields being completed.
128	INTSUP-757	The Integrum users can bypass the Smartform edit lockout feature. When a form is opened in the second tab, the user can edit the Smartform simultaneously when the same form is opened and edited in the first tab in the browser. Instead, the app should prompt a Smart form edit lockout message.
129	INTSUP-819	When the user tries to export a smartform from the views, the app displays an error message "Error: check console".
130	INTSUP-840	In the View Library, when the user selects the 'Export to Excel' button, the description column in Excel spreads across other columns.
131	INTSUP-856	The format of the date in the audit trail is not displayed correctly. The multiple dates in the audit trail are displayed in a random format.
132	INTSUP-860	When the user tries to filter out the views based on the free text search option, the app does not display the results based on the search.
133	INTSUP-888	The Create PDF functionality is not working as expected. When a PDF is generated, the document displays multiple headlines along with hidden fields.
134	INTSUP-930	In the Integrum application, after a template upgrade, the custom reference label for the server ID is not working as expected.
135	INTSUP-991	When the Email notification for the set-up "Enable Submit to form MR Notification" is configured, the notification format gets changed when the form is reopened.
136	INTSUP-1125	When the Scheduled Competency assessment reminder is set, the Integrum users receive notifications at the unexpected time.
137	INTSUP-1241	When the Integrum application is upgraded to v9.18, the users are unable to export a Smartform and the app displays an error message "Check Console".
138	INTSUP-1275	When the Integrum application is upgraded to v9.17 from v9.15, the export to word functionality does not work as expected and displays the error message "Error: Check Console".
139	INTSUP-1302	When the user edits a View, the form fields are getting displayed.
140	INTSUP-1342/ INTSUP-4052	When a user creates a document on the Operational Control page and saves it, it does not appear on the Operational Control View page. Instead, documents created using the OU structure should be visible when selecting the OU values within the Operational Control View.

141	INTSUP-1368	When the Document Controller's employee profile is modified after the document with the 'Revision Notification & Competency Assessment' assigned has been created, the Operational Procedure is removed from the document, instead, it should not be removed.
142	INTSUP-1426	The OU fields are not auto-filled when a Smartform is used as a subform.
143	INTSUP-1457	The field level notification does not trigger when the workflow stage is set as 'Send for Review'
144	INTSUP-1461	The Operational Control tree structure in the application is displayed in an incorrect order.
145	INTSUP-1517	The filter options for the field 'Meeting Type' are displayed blank in Views.
146	INTSUP-1542	When the user selects Send for Initiator Review in a Smartform when in Open status, the app prompts to complete the "Mandatory on 'In-Review'*" field instead, the system should ask the "Mandatory on 'In-Review'*" when the form is In Review status.
147	INTSUP-1641	When the user tries to upload .msg or .eml email file extensions via attachment fields, the app displays an unsupported format message. Instead, the users should be able to upload .msg and .eml formats.
148	INTSUP-1693	When a user tries to edit a CAR form, the form does not open and displays the "The Page was unresponsive" error.
149	INTSUP-2719	When an Integrum user runs an RTA and exports forms, the app displays an incorrect creation date.
150	INTSUP-2706	When a new version of a document is created for an already existing document, the latter will be archived. The archived document's attachment is missing when the new document version is created.
151	INTSUP-2999	When a user creates a new version of a document, the old version of the same document is not getting archived.
152	INTSUP-3091	When a new user is imported to the app, the ACL group is not allocated to the new user.
153	INTSUP-3094	In the Integrum app, when the Alumni employee is imported as a new user, the application does not allow to change the status of the user to a current user.
154	INTSUP-3101	When a smartform is raised in the mobile app and submitted, the section status is not updated according to the form status when opened in the web app.
155	INTSUP-3569	When the Scheduling Workflow Option setting is set to 'Create Schedule - Create Draft forms within schedule - Save as Draft Schedule', the system is creating the form in the Open status, instead of Draft status as expected.
156	INTSUP-3615	When a user tries to filter Views using the date filters, the results do not show the Views of the specified date range values.
157	INTSUP-3749	The app users are unable to create/update (edit) the employee profile as the sync is not working for employees when the user tries to create/update an employee profile.
158	INTSUP-3775	When an Integrum user tries to attach a file with the type '.pptx' in the Smartform, the file does not get attached.
159	INTSUP-3803	When an Integrum raises a Smartform and saves it without filling in the mandatory details, the form does not prompt any message for filling mandatory fields. The form also allows the user to save it and after saving the form, all the filled details are not displayed.
160	INTSUP-3937	When an Integrum mobile app user raises and saves/submits a Smartform and reopens the same Smartform in the web application, the OU details are displayed incorrectly.

161	INTSUP-3962	The user is unable to upload an attachment to a Smartform at first instance. The user had to try again to upload an attachment.
162	INTSUP-4080	When a user creates a form using the Form Template which is configured as Section Workflow in workflow, the system throws a runtime error.
163	INTSUP-5016	When an Integrum user creates a new document and makes a new version of the same document, the new versioned document is not unlocked.
